Section I

GENERAL

1. Purpose.

a. These regulations prescribe the procedures for the following types of movements *by water, rail, or air* which will be necessary under operation of RR 1-1, War Department, "Plan for Readjustment of Military Personnel After The Defeat of Germany":

(1) Return of category IV units and reception station groups from overseas commands to the United States and subsequent movement to reception stations.

(2) Movement of nonessential personnel serving in the continental United States, from posts, camps, and stations to separation centers.

(3) Movements incident to repatriation of surplus territorial personnel and territorial units designated for demobilization whether serving in overseas commands or in the United States.

b. When the provisions of this regulation become effective, as announced by the War Department, all current War Department directives in conflict with the scope of this publication are superseded by the procedures prescribed herein.

2. Distribution.

Commanding generals of overseas commands will make prompt distribution of these regulations to all installations and activities which will be concerned with the movements covered herein. It is imperative that prompt distribution of these regulations be made to commanders of overseas ports and other overseas installations which are vitally concerned with execution of the procedures established herein.

3. Definitions. (See also RR 1-1.)

a. **Category IV units.** For the purpose of these regulations all units to be demobilized in the United States, whether returned from overseas for demobilization or designated in the United States for demobilization.

b. **Code designations.** Codes assigned to identify movements, units, and groups.

c. **Demobilize.** To disband, discontinue, or inactivate an element. (See RR 1-6.)

d. **Disposition center.** An activity at a United States port staging area, under jurisdiction of the port commander, established pri-

marily for demobilization of category IV units returned from overseas and for processing and forwarding personnel of such units to reception stations.

e. **Essentials.** Personnel to be retained in service; officers and enlisted personnel who do *not* meet the standards for separation established in RR 1-1, or who do *not* meet any other separation standard.

f. **Enlisted personnel.** Includes enlisted men and enlisted women.

g. **Escort personnel.** Officers and noncommissioned officers detailed to accompany groups or members of groups, specifically designated to maintain discipline and control during movements.

h. **Groups.** Reception station or separation groups, unless otherwise indicated.

i. **Individual.** Officer and enlisted personnel, unless otherwise specified.

j. **Major commands.** Army Ground Forces, Army Air Forces, Army Service Forces, and defense commands inside the continental limits of the United States. (See also definition of "Major Forces" in RR 1-1.)

k. **Nonessentials.** Officers and enlisted personnel who meet the standards for separation established in RR 1-1 and have been designated for separation from the service, or who, by operation of other regulations, are designated for separation from active service.

l. **Officer.** All types, including warrant and flight officers, Women's Army Corps officers, nurses, and other commissioned women of the Medical Department.

m. **Overseas commands and theaters.** Wherever used herein, the terms "overseas commands" and "theaters" include theaters of operation, departments, defense commands, separate base commands, USAF in Central Canada, North Atlantic Division, ATC (For Eastern Canada only), and Northwest Service Command.

n. **Personnel.** Includes officer and enlisted unless otherwise specified.

o. **Personnel centers.** Installations operated by the Commanding General, Army Service Forces, under the immediate control of the commanding general of the service command in which located, at which are established, as separate activities, reception stations, separa-

RR 1-2

tion centers, and certain other personnel activities.

p. Readjustment plan. The plan and processes set forth in RR 1-1 which prescribe the manner in which the War Department Troop Basis of the Army will be readjusted to suit requirements for the war against Japan.

q. Reception station. An activity within a personnel center operated by the Commanding General, Army Service Forces under immediate control of the commanding general of the service command in which located, for disposition of surplus personnel returned from overseas. At a reception station, personnel received from overseas will be placed in separation or reassignment channels according to their designation as essential or nonessential as determined by the major forces.

r. Reception station groups. Groups formed in oversea commands and at disposition centers for the purpose of moving surplus personnel from oversea commands and from United States ports to reception stations.

s. Separation. Discharge, transfer to the Reserve, or release from active Federal service.

t. Separation center. An activity within a personnel center operated by the Commanding General, Army Service Forces, under immediate control of the commanding general of the service command in which located, established to effect separation of Army Ground Forces, Army Air Forces, and Army Service Forces, personnel transferred thereto.

u. Separation groups. Groups formed at posts, camps, and stations in the United States, for the purpose of movement of nonessentials to separation centers.

v. Surplus personnel. Personnel who, as a result of reorganization of oversea commands under the new troop basis, are excess to the requirements of the commands.

NOTE.—Any personnel stationed overseas, except those classes which are specifically excluded by War Department directive from separation at War Department separation centers, who by operation of current regulations become eligible for separation, will, for movement purposes, be considered to fall in the surplus category and will be returned as members of category IV units or reception station groups.

w. Territorial personnel. All individuals who at time of entry in the military service of the Army of the United States were residents

of territories or possessions of the United States, including Alaska, Puerto Rico, Territory of Hawaii, the Philippine Islands, Panama Canal Zone, and the Virgin Islands.

x. Territorial units. Those units which are comprised primarily of personnel from territories or possessions of the United States.

y. Unit. For the purpose of these regulations, any tactical or administrative and tactical organization. Reception station and separation groups will not be considered as units.

4. Personnel to Whom Applicable.

The procedures prescribed herein pertain *only* to units, groups, and individuals being moved under RR 1-1, for other than redeployment purposes. (See par. 5a.)

5. Personnel to Whom not Applicable.

The following directives and changes thereto will remain in effect so far as they pertain to other types of movements, except where specifically directed otherwise by the War Department:

a. Movement of units and individuals for deployment or redeployment of Army after defeat of Germany. Current War Department instructions concerning the oversea movement of troops, in particular War Department letter, AG 370.5 (23 Jun 43) OB-S-E-M, 30 June 1943, subject: Procedure Concerning the Movement of Troops Overseas, as supplemented by letter, AG 370.5 (24 Nov 44) OB-S-E-M, 29 November 1944, subject: War Department Policies and Procedures Governing the Redeployment of the Army Upon Cessation of Hostilities in Europe (Annex B—Redeployment Movements), or supersessions thereto, will apply to all movements of units and individuals for deployment or redeployment upon defeat of Germany.

b. Individuals returning by water, air, and rail for following purposes under current War Department policies:

Individuals returned under rotation policies and quotas, on *permanent change of station*.

Individuals returned under policies and quotas, on *temporary change of station for recuperation*.

Casuals returned for specific temporary duty.

Casuals returned to a specific station named in travel orders, on permanent change of station.

Casuals returned for emergency furlough or leave of absence.

Casuals returned as candidates for officers training.

The War Department publication, AG 370.5 (10 Aug 44) OB-S-SPMOT-M, 16 August 1944, subject: Procedure for Return of Individuals (PRI), and supplements or supersessions thereto will continue to apply to return movements of such of the above individuals *as are selected from new troop bases of theaters after the defeat of Germany.*

c. Sick and wounded and their attendants.

The procedures herein do not apply to movements of sick and wounded evacuated to the United States. These procedures are prescribed in letter AG 704.11 (3 Jun 44) OB-S-E-SPMOT-M, 8 June 1944, subject: Procedure for Evacuation of Patients by Water or Air from Overseas Commands.

d. Personnel to be separated from service who fall in following categories and who, by current War Department directives, are excluded from separation at separation centers in United States. (See sec. IV, WD Circular No. 422, 1944, as amended, or supersessions thereto).

(1) Physical disability (including mental cases).

(2) Dismissal (officers) or dishonorable discharge (enlisted personnel).

(3) Pregnancy.

(4) Acceptance of other active military status in any of the armed forces.

(5) Individuals, including aliens, *but not including surplus territorial personnel* (see sec. VI) who entered the military service at points outside the continental United States and who, upon separation from the service, are to be returned to the point of entry into service or to another point outside the continental United States.

(6) Personnel received at reception stations from induction stations on whom a final determination has been made that discharge or release from active duty will be effected.

(7) Enlisted reservists including members of WAC not on active duty who, upon reporting for active duty, are found physically disqualified.

(8) Retirement.

(9) Conviction by civil court.

(10) Individuals who would require an attendant to accompany them to a separation center.

(11) Individuals to be separated under the provisions of WD Circular No. 3, 1944.

6. Plan of Movement.

a. From overseas commands to United States.

(1) *Units.* The principal vehicle for return of surplus personnel *from inactive theaters* will be category IV units (those to be demobilized), readjusted by overseas commanders in accordance with paragraph 14, RR 1-1.

(2) *Reception station groups.* Personnel in theaters to be moved to the United States under the readjustment plan, who cannot be included in category IV units, will be returned in reception station groups organized by overseas commanders as prescribed in paragraph 11 below.

(3) *Individuals.* While the majority of personnel will be returned to the United States as members of units, or groups, as contemplated above, it is anticipated that it may be necessary to return certain personnel as individual movements, to be effected by air, including the following (see sec. IV):

(a) Individuals, by name, directed by the War Department to return by air for performance of a specific mission and disposition in the United States (reassignment or separation).

(b) Staff officers and key personnel selected by overseas commanders.

(c) Numbers of other individuals directed to return by air.

Movements of individuals singly will not be effected by water transportation under the readjustment plan. Such individuals must be returned as members of units or groups.

b. From United States ports to reception stations. Immediately after debarkation, category IV units will be moved to disposition centers. So far as possible, within 48 hours after debarkation, reception station groups (including those organized overseas and those formed at disposition centers) will be moved to appropriate reception stations. Where appropriate, the provisions of section IV, WD Circular No. 358, 1944, and WD Circular No.

RR 1-2

229, 1943, or supersessions thereto, will be complied with.

c. Returns from Canada. Readjustment movements from Canada will be effected in accordance with detailed procedure contained in section V.

d. Movement of territorial units and territorial personnel. Territorial units designated for demobilization and surplus territorial personnel will be moved to the appropriate territorial possession in accordance with detailed procedure contained in section VI.

e. From posts, camps, and stations in United States to separation centers. Nonessentials will be formed into separation groups and moved to appropriate separation centers. Separation groups will be consolidated within service commands in accordance with detailed procedure contained in section VII.

7. Installations in United States Used for Readjustment.

a. Disposition centers and personnel centers (including reception stations and separation centers) in the United States to be utilized in operation of RR 1-1 are designated in appendix I.

b. Only five personnel centers (Fort Dix, N. J.; Fort Bragg, N. C.; Fort Sheridan, Ill.; Fort Sam Houston, Tex.; and Camp Beale, Calif.) have been designated to receive female personnel. Care must be exercised that female personnel are not placed in groups destined for personnel centers other than the five designated.

c. Areas to be served by personnel centers will vary depending upon the theater from which personnel are being returned. Care will be exercised that the appropriate section of appendix I is utilized by the theater concerned in determining the personnel center for which individuals are destined.

8. Readjustment Control Center.

It is contemplated that a Readjustment Control Center will be established in the War Department to coordinate the planning and execution of the readjustment movements covered by this publication. Separate instructions will be issued concerning the functions and responsibilities of the Control Center.

9. Demobilization of Elements.

The procedure by which category IV elements are to be demobilized is contained in RR 1-6, "Standing Operating Procedure for the Demobilization of Category IV Elements."

Section II

MOVEMENTS FROM OVERSEAS TO UNITED STATES BY WATER TRANSPORTATION

10. Preparation of Units. (See par. 14, RR 1-1.)

a. Units designated for return to the United States for demobilization, having been readjusted in accordance with RR 1-1, will be assembled and processed in oversea commands preparatory to movement to the United States. Such processing will include the withdrawal of excess clothing and equipment, issue of equipment required for movement, issue of serviceable and presentable clothing where required, physical inspections of personnel, perfection of personnel records, and disinfestation. These matters are covered in more detail in the pertinent sections below.

b. For the purpose of these movements, the strengths of category IV units, as prescribed by applicable tables of organization and equipment, are waived. Oversea commanders are authorized to permit movement of category IV units at either an overstrength or understrength as circumstances dictate. It is suggested that overstrength of units not exceed 50 percent of T/O strength.

11. Organization of Reception Station Groups.

a. Each reception station group will be composed exclusively of personnel returning to the same reception station. These groups will be organized by oversea commanders as follows:

(1) Ascertain the address in the United States to which, under current laws and regulations, each individual is entitled transportation upon separation from active service.

(2) Determine the reception station, of those listed in appendix I serving the designated address. In determining the appropriate reception station to which individuals are to be

moved the designation of *particular states or parts of states* to be served by a reception station will be adhered to strictly.

(3) Assign individuals to groups assuring that all members assigned to a particular group are destined for the same reception station. Care will be exercised to assure that female personnel are placed only in groups destined for reception stations designated to receive female personnel.

b. Escort personnel.

(1) Each group will be assigned officer, and noncommissioned officer supervisory personnel in accordance with the table given below, which is considered the minimum requirement. Theater commanders will designate escort personnel who are qualified by training and experience for this type of assignment, if possible. The individual senior in grade of the selected supervisory personnel will be the group leader and will be so designated in the orders. As far as possible, officers and noncommissioned officers who, themselves, are surplus will be designated as escort personnel. If adequate escort personnel is not available within the groups, necessary personnel will be furnished by the oversea commander.

<i>Size of group</i>	<i>Minimum supervisory personnel required to accompany each group</i>
2-9 enlisted personnel.	The individual senior in grade.
10-49 enlisted personnel.	1 officer or noncommissioned officer.
50-199 enlisted personnel.	1 officer, 2 noncommissioned officers.
200-499 enlisted personnel.	1 captain, 2 officers (junior grade), 4 noncommissioned officers.
500-1,499 enlisted personnel.	1 field officer; 1 captain; 2 officers (junior grade); and 4 noncommissioned officers per 500 enlisted personnel or major fraction thereof.
*2-49 officers.....	The officer senior in grade.
*50-99 officers.....	1 field officer or captain, as necessary.
*100-over officers.....	1 field officer or captain, as necessary, per 100 or major fraction thereof.

*Casual. If at all possible, these officers will be assigned to groups which include enlisted personnel primarily.

(2) The mission of personnel assigned to escort groups is to deliver the members thereof, together with all records, to the commander of

the appropriate reception station and be responsible for the *control, discipline and conduct* of such personnel until the mission is completed. (See par. 15, RR 1-1.) Upon completion of this duty and upon expiration of recuperation period, if such has been granted, the officers and noncommissioned officers not designated as surplus will be moved to such places as their orders may direct. (See par. 13a (5).)

(3) Medical personnel will be assigned to groups as deemed necessary by the oversea commander, subject to availability of such personnel within the theater. The following assignments are suggested if the groups are proceeding separately and adequate medical service is not available on the transport:

For groups of 50-199 individuals.	1 medical noncommissioned officer.
For groups of 200-499 individuals.	1 medical officer.
For groups of 500-1,499 individuals.	2 medical officers.

12. Code Designations.

Each category IV *unit* and *group* returned to the United States under the readjustment plan will be assigned a code designation, as outlined below. These designations are similar to those prescribed in the War Department publication, PRI. This scheme has been adopted purposely in order to conform so far as possible with existing procedures. The letter "R," however, is added to the *initial* character to distinguish readjustment movements from other types of movements.

a. The first character will consist of letters designating the oversea command from which the movement originates, and the successive number of the movement from an oversea command. For example, the first shipment from an oversea command, which may be comprised of several category IV units, or reception station groups, will be numbered 1. Regardless of the composition of the first movement, the next movement from this oversea command will be numbered 2, and consecutive numbers will be assigned in the same manner for succeeding movements. Attention is directed to the fact that the movement numbers in these codes will begin with the number 1 and run as a separate series from those prescribed in para-

RR 1-2

graph 24 of the War Department publication, PRI. Letters are assigned to oversea commands as follows:

RA..... US Army Forces, South Atlantic.
RB..... Persian Gulf Command.
RC..... Caribbean Defense Command.
RD..... Eastern Defense Command.
RE..... US Forces in the European Theater of Operations.
RF..... US Army Forces, Pacific Ocean Areas (for South Pacific area only).
RG..... Greenland Base Command.
RH..... US Army Forces, Pacific Ocean Areas (for Central Pacific area only).
RJ..... West African Service Command.
RK..... Southwest Pacific Area.
RL..... US Army Forces in Liberia.
RM..... US Army Forces in the Africa-Middle East Theater of Operations (exclude WASC and Liberia).
RN..... US Forces in Mediterranean Theater of Operations.
RP..... Northwest Service Command.
RQ..... North Atlantic Division, ATC (for Eastern Canada only).
RT..... Control Office and Hq., US Army Forces in Central Canada.
RW..... Alaskan Department.
RAA..... US Forces, India-Burma Theater.
RBB..... Seattle Port of Embarkation (for Prince Rupert and Juneau Sub-Ports only).
RCC..... Iceland Base Command.
RDD..... US Forces, China Theater.

b. The second character will be a dash.

c. In the case of units, the final character will be a letter, assigned by the oversea commander representing the unit being moved. Double or triple letters, such as BB or LLL, may be used as necessary.

d. In the case of reception station groups, the final character will consist of the code number of the reception station to which the group is destined. (See appendix I.)

e. Following are examples of code designations prepared in accordance with the above:

(1) RE101-A. In this instance "RE" represents the European Theater of Operations; "101" indicates the 101st movement from the theater; and "A" represents the unit being moved.

(2) Expanding the above example to represent a movement composed of more than one unit, the following example is given: RE101-A; B; C; D. In this example the additional

units have been designated in the code designation, each separated by a semicolon.

(3) An additional example is: RN85-1;5;7. "RN" represents the Mediterranean Theater of Operations. "85" indicates the 85th movement from this theater. "1"; "5"; "7" indicate reception station groups destined to reception stations at Fort Devens, Mass.; Camp Shelby, Miss.; and Fort Sheridan, Ill.; respectively.

13. Movement Orders. (See appendices II and III.)

Orders will be issued for movement under the readjustment plan, of each unit and group to the United States. The authority for movement from oversea commands to the United States will be the War Department action approving schedules for return of units selected for demobilization and return of surplus personnel. Each movement order will contain two separate sections providing information as indicated in *a* and *b* below.

a. Directive. The directive will contain the following:

(1) The oversea command which issued the orders.

(2) Code designation for each unit, or group, as prescribed in paragraph 12. Units containing Negro personnel will be indicated by an asterisk.

(3) Unit Identity. Where a unit is composed of several subordinate units, the listing will be by organic units of the larger unit. For example, in the case of an infantry division, the listing would be by regiments, separate battalions, and separate companies, or comparable units. Units containing Negro personnel will be indicated by an asterisk.

(4) The escort personnel, as prescribed in paragraph 11b, will be designated by name for each group. The custodian of records, who will normally be the group leader, also will be indicated by name.

(5) In the case of those officers and non-commissioned officers moved to the United States as escort personnel who are not designated as surplus and whose return to the oversea command is desired, orders will indicate: that return to the oversea command is desired; the length of recuperation if any, to be granted; the address in the United States at which the

individual desires to spend recuperation period; mode of transportation recommended for return to oversea station; and, where applicable, general priority or air priority designator on which the individual is to be returned.

(6) Statement indicating whether travel is in connection with permanent change of station or temporary duty and whether travel is with troops. (See WD Circular No. 260 and sec. II, WD Circular No. 356, 1944, as amended.)

(7) Instructions regarding postal procedures as prescribed in paragraph 111a and c, Changes No. 5, FM 12-105.

b. Personnel roster. The personnel roster will be a separate annex or inclosure to the directive. It will contain the unit or group code designation (units containing Negro personnel will be indicated by an asterisk) and will provide the following information for each individual:

- (1) Name.
- (2) Grade.
- (3) Army serial number.
- (4) Arm or service.

(5) Individuals who have been assigned to duty with the Army Air Forces, including arms and services therewith, will be listed in a separate section under a heading "AAF Personnel." Army Air Forces combat crew personnel will be designated by the letters "CC". (Not applicable to units).

(6) Negro personnel will be so indicated by the letter "(N)" immediately following their names (not applicable to units).

(7) Address to which each individual is entitled transportation upon separation.

(8) Military occupation specialty specification serial number.

(9) Adjusted service rating score.

(10) Applicable discharge regulation (*for personnel to be separated* by operation of current separation regulations only. For example: AR 615-365 or AR 615-368). (See par. 3e.)

c. Classification. Orders covering movement of groups will be classified *Restricted*. Orders covering movement of units will be classified *Confidential*. If, for a cogent reason, it is necessary to assign a classification of *Secret* to a movement order, such order will cover only the movement of the unit concerned.

14. Preparation and Disposition of Movement Orders.

a. Preparation.

(1) The movement orders (directive and personnel roster) for all units and reception station groups being returned under these regulations will be prepared on dual mimeograph stencils. This will produce in a single operation two identical stencils for each order. For convenience these are referred to hereinafter as Stencil No. 1 (Top) and Stencil No. 2 (Bottom). The *directive* for units and for *each* reception station group will be placed on a separate stencil or a separate group of stencils. Likewise the *personnel roster* for *each* unit and *each* group will be placed on a separate stencil or a separate group of stencils.

(2) In order to facilitate prompt disposition of personnel upon demobilization of units at a disposition center in the United States, the listing in unit personnel rosters will be by separate groups, depending upon the reception stations to which the personnel will be moved upon demobilization of the units. Each such group will be listed on a separate dual stencil or set of stencils. This will permit reuse of the stencils at United States ports not only for production of the basic oversea orders but also for producing reception station group movement orders without retyping vast amounts of personnel data.

(3) The address in the United States to which the individual is entitled transportation upon separation from the service will be the basis of determining the group under which each individual will be listed. Care will be exercised that the appropriate list (A, B, or C) in appendix I, applicable to the theater from which movement is originating, is used in making this determination.

(4) (a) As movement orders (directive and roster) are being prepared, the No. 1 stencils will be used to produce the number of copies which may be required locally for planning purposes and to provide the copies required by b (1) (a) below.

(b) Each No. 1 stencil will then be placed in a self-cleaning file folder and retained until embarkation. At that time they will be cor-

rected to reflect the personnel actually embarked, and any other necessary changes. This can be accomplished by use of correction fluid and typing the correction on the stencil. When operational necessity prevents the type of additions on the No. 1 stencil, such additions may be typed on a separate (single) stencil to accompany the No. 1 stencil. When all corrections have been made the statement "corrected as of embarkation" will be typed on the No. 1 stencils which will then be used to produce the number of corrected copies as may be required for use in the oversea command and to provide the copies indicated in *b* (1) (*b*) and *b* (2) below. Each stencil will then be placed in a self-cleaning file folder. Each folder will be appropriately marked to identify the stencil which it contains. It is recommended that this be accomplished by running the folder through the mimeograph machine before the stencil is removed.

(5) The No. 2 stencils will be retained until embarkation but will not be used overseas to produce copies of orders. At time of embarkation they will be corrected to reflect the personnel actually embarked, and any other necessary changes. The statement "corrected as of embarkation" will be typed thereon.

b. Disposition of orders.

(1) (*a*) At least 3 days prior to embarkation, one copy of the order (directive and roster) produced from the No. 1 stencils in accordance with *a* (4) (*a*) above, together with the transmittal letters and WD AGO Forms 66-2, 66-3, and 66-4, as prescribed in paragraph 15 *b* (3) will be forwarded by air courier or air mail (whichever will provide more rapid delivery), to The Adjutant General, Attention: Officers Branch (PO-A).

(*b*) Within 24 hours after embarkation, a copy of the order (directive and roster), produced from the No. 1 stencils (corrected as of embarkation) (see *a* (4) (*b*) above) with letter of transmittal and additional WD AGO Form 66-2, 66-3 and 66-4, as may be necessary, will be forwarded by air courier or air mail (whichever will provide more rapid delivery), to The Adjutant General, Attention: Officers Branch (PO-A).

(2) (*a*) Not later than 24 hours after embarkation

the No. 1 stencils (used—corrected as of embarkation) and one copy of the orders produced therefrom, will be forwarded by air courier or air mail (whichever will provide more rapid delivery) to the commanding general of the United States port at which debarkation is scheduled.

(*b*) The No. 2 stencils and two copies of the orders (directive and roster) produced from the No. 1 stencils (corrected as of embarkation) will be given to unit or group commanders who will be instructed to retain them in their personal possession so as to be readily available when called for by proper authority at the United States port. During the period aboard ship en route to the United States, the unit or group commander will correct the roster stencils and copies to agree with the transport commander's certified copies of the passenger lists and to reflect any changes which may occur en route. If a unit is carried on more than one ship, that portion of the No. 2 stencils and copies of orders covering the men on each ship will be carried and corrected by the senior officer of the unit aboard. Reasonable care will be exercised in handling the stencils while en route to the United States. Each stencil will be placed in a self-cleaning file folder. This precaution is taken so that the file folder will be immediately available in the event the stencil is used for any purpose while en route to the United States. If in proper condition, the file folders will be used at the United States port for forwarding the stencils to the reception station. It is suggested that the stencils (in file folders) be carried in a large manila envelope in order to reduce to the minimum the amount of folding required. The stencils will *not* be carried in HAND or HOLD baggage.

c. Amendments. Since the stencils for movement orders will be corrected as of embarkation, it is contemplated that amendments will not be necessary; however, if circumstances necessitate issue of an amendment to an order after personnel have departed, such amendment will be prepared on a dual stencil, both copies of which will be forwarded by air courier or air mail to the commander of the United States port at which debarkation is scheduled. A copy of each such amendment, produced from the No. 1 stencil, will be forwarded to The

Adjutant General, Attention: Officers Branch (PO-A) (accompanied by transmittal letters and copies of WD AGO Forms 66-2, 66-3 and 66-4, if necessary). (See par. 15b(3).)

15. Records.

a. General. Although specially trained personnel are to be provided by oversea commanders to review and perfect various records, unit and group commanders will have an excellent opportunity during periods in oversea assembly or staging areas to render valuable assistance in this regard. This will not be construed to relieve organization commanders of their primary responsibility of insuring that service records are correct and up-to-date prior to the time of arrival at oversea assembly or staging areas.

b. Personnel records.

(1) Prior to departure from oversea commands, the personnel records listed below of each individual, as applicable, will be carefully checked and the individual concerned interviewed to determine that the records are available, are accurate, and are posted up to date. Careful check will be made to insure that such items as combat pay, glider pay, parachute pay, etc., are entered in the service records. Such records will be carried with the unit or group concerned, in the custody of the unit or group commander. If the unit is to be transported on more than one ship, the personnel records will be segregated so that records of individuals on each ship will be carried aboard that ship and in the custody of the senior officer of the unit aboard. Prior to departure from the oversea command, a copy of the "Records Check List" (appendix X) will be accomplished and forwarded with the records of each individual returning to the United States. The check list will be placed as the top sheet with the records of each individual. Records may then be checked at various stages as shown on the form.

ALL OFFICERS:

*WD AGO Form 65 or 65-1 (officer's identification card).

WD AGO Form 66-1, 66-2 or 66-3 (officer's and warrant officer's qualification card).

*To be carried by each individual.

*WD AGO Form 77 (officer's pay data card).

*Record of leave accrued and granted (to be carried by officers, as prescribed in AR 605-115). (Record may be in any form desired by the individual.)

ALL ENLISTED PERSONNEL:

WD AGO Form 20 (Soldier's Qualification Card).

WD AGO Form 24 (Service Record) with allied papers required by current directives.

*WD AGO Form 28 (Pay Data Card).

C&E Adjustment Form, as prescribed in WD Circular No. 72, 1945.

WD AGO Form 163 (Adjusted Service Rating Card).

ALL PERSONNEL:

WD AGO Form 8-114 (formerly Form 78) (Syphilis register; for individuals under treatment for syphilis).

*WD AGO Form 8-115 (formerly Form 78a) (treatment record; for individuals under treatment for syphilis).

*WD AGO Form 8-117 (formerly Form 81) (Immunization Register in duplicate; original carried on person).

Copy of board proceedings such as reclassification, disposition, AR 615-368 and AR 615-369 proceedings. When applicable, such copy will contain indorsement by convening authority and approval of office having discharge authority.

ARMY AIR FORCES RATED PERSONNEL:

*Copy of orders bestowing aeronautical rating.

*Copy of orders placing personnel on flying status.

*Individual Flight Record (WD AAF 5) with allied papers.

*Instrument pilot certificate (AAF 8 or 8a). Summary of bombing (AAF-12-B) (bombardier only).

*Physical record card (WD AAF 206).

Standard AAF medical statement.

Army Air Forces individual training record (reference AAF Ltr. 50-55).

Individual Equipment Issue Record (AAF 121-AAF Equipment).

PARACHUTE AND GLIDER PERSONNEL:

*Copy of orders announcing parachutist or glider rating.

*Copy of orders or certificates placing personnel on parachutist or glider status as required by current regulations.

(2) In the event any of the above records are missing and cannot be located, duplicates will be prepared in accordance with current directives applicable. If missing records cannot be replaced or can be only partially reconstructed, a certified statement giving the facts in the case will be forwarded in lieu of the missing record or will be attached to the partially completed duplicate.

NOTE.—The above list is not to be considered as an all-inclusive list of records pertaining to personnel returned to the United States. This list indicates the forms and records which are essential for proper disposition of personnel, and which *must* be processed and forwarded when the personnel are moved to the United States. Oversea commanders are responsible that all *pertinent* documents, forms, records, allied papers, duplicate copies of allotments, insurance records, records of WAC personnel, and other pertinent information usually retained in the records files of individuals are forwarded with personnel returned to the United States.

(3) In order to permit advance planning for determination of essentiality of officers and for their expeditious disposition in the United States, oversea commanders will forward to The Adjutant General, Attention: Officers Branch (PO-A), a certified copy of the WD AGO Form 66-1 (prepared on WD AGO Form 66-4), 66-2 or 66-3 for each officer being returned. (See also RR 1-5.) These copies will be dispatched by *air courier or air mail*, whichever will provide more rapid delivery, as far in advance as possible and in any event, at least 3 days prior to departure of the officers. They will be accompanied by a letter of transmittal, which will indicate the number of Forms 66-2, 66-3 and 66-4 inclosed, and the probable date of departure of the personnel from the oversea command. A copy of the movement order (movement directive and roster) will be included. (See par. 14b(1).) These papers will be securely fastened in such manner as to assure that they will be received by The Adjutant General simultaneously. Prior to dispatch a careful check will be made to insure that

*To be carried by each individual.

a copy of Form 66-2, 66-3, or 66-4 is provided for each officer listed in the movement order (roster). It is of paramount importance that these orders and Forms 66-2, 66-3 and 66-4 be promptly dispatched to The Adjutant General so that there will be no delay in the disposition of officers being returned. Therefore, *each oversea commander is specifically charged with the responsibility* that these documents are dispatched as directed above.

(4) In each case where determination has been made that separation is to be effected under current separation regulations (as distinguished from readjustment separation standards) entry will be made under "Remarks Administrative" in the Service Record (enlisted personnel) as prescribed in TM 12-230 or under "Remarks" on Form 66-1, 66-2, or 66-3 (for officers), indicating the regulation applicable and the specific cause for separation. For example: AR 615-365, "Below Minimum Standards for Induction"; or AR 615-368, "Habits and Traits of Character which render retention in the Service Undesirable"; or AR 605-230, "Reclassification."

c. Administrative records.

(1) The administrative records (current) listed below will accompany units returning from oversea commands for demobilization. These records will not be carried as hold baggage, but will be readily available to the unit and transport commanders aboard ship and to the United States port staging area commander upon arrival in the United States. The containers in which these records are carried will be marked "TAT" and the unit to which they pertain.

Company or similar unit

Morning Reports.

Daily Sick Reports.

Duty Rosters.

Pay rolls and vouchers (retained copies).

Property Book.

Record of Company Punishment.

Council Book with Vouchers.

Company orders file.

Essential circulars and bulletins.

Other records, orders, directives, 201 files, and so forth, expected to be used during the period of movement.

*Regimental, separate battalion, or similar headquarters
(Adjutant)*

Regimental orders file.

Appropriate T/O & E's, T/BA's, and T/E's.

Directives.

Message Center Log.

Other records, orders, directives (including copies of movement orders and any instructions pertaining to demobilization of units), 201 files, and so forth, expected to be used during the period of movement.

(2) Noncurrent files of all elements in overseas theaters and commands are retired upon a continuing basis to temporary records depots in accordance with the provisions of WD Circular No. 416, 1944, as amended by section IV, WD Circular No. 481, 1944. Noncurrent organizational files still in the possession of a category IV unit at an overseas staging, concentration, or assembly area and which are not required for use during the period of movement, will not be retired to the temporary records depot in the theater or command, but will be arranged in general classes, screened for disposable material, and boxed as prescribed in paragraph 7, WD Circular No. 416, 1944, and will accompany the unit. They will be carried on the vessel transporting the troops and will be given top stowage so as to permit prompt unloading upon arrival at the United States port.

(a) In boxing files returned with the category IV unit as impedimenta, reduction in their bulk will be effected through, (1) the elimination of records authorized for destruction by Army Regulations or War Department instructions, and; (2) the disposal of nonrecord material, as described in AR 345-10.

(b) An inspection of records prior to packing will be made by the unit commander or a commissioned officer designated for the purpose.

(c) Individual medical records maintained by field medical units will be segregated from other medical records and boxed separately.

(d) Each box will be numbered consecutively, clearly marked to show estimated gross weight and cubic content, and the unit to which the records pertain. A list of contents will be placed inside each box.

(e) In addition, a listing in triplicate, showing the ownership and general contents of each box, will be prepared and retained by the unit

with its current organizational records, pending demobilization.

d. Historical records (unit histories). Particular care will be taken to insure that the unit histories are returned with other records so that they will be available when required in the future. (See AR 345-105.)

16. Clothing and Equipment.

a. Allowances for movement.

(1) The following prescribe the equipment to accompany units and groups during the movements covered herein:

List of equipment to accompany category IV units returning from overseas commands (app. V).

Table of organizational equipment for groups (app. VI).

(2) Enlisted personnel will be provided clothing and equipment as prescribed in WD Circular No. 72, 1945, and changes thereto. Clothing and equipment accounts will be adjusted accordingly.

b. Excess property. All property, including heavy weapons, small arms, vehicles, clothing, individual equipment, and so forth, in excess of that prescribed above (except personally owned property of individuals), will be turned in to supply agencies designated by the overseas commander concerned prior to departure of units and groups.

c. Replacement issues. Prior to departure from the overseas command, the clothing and equipment in the possession of each unit and group will be inspected to insure that it is serviceable. Shortages will be filled and unserviceable items will be replaced prior to departure.

d. Baggage. The provisions of War Department letter, AG 524 (18 Aug 44) OB-S-SPMOT-M, 29 August 1944, subject: Processing of Baggage from Overseas, as amended, govern requirements for processing personal baggage during these movements.

e. Customs clearance. The inspections and forms necessary for speedy customs clearance in the United States will be accomplished in accordance with WD Circular No. 335, 1944, as amended by section IV, WD Circular No. 31, 1945, and section III, WD Circular No. 75, 1945.

f. Marking. All organizational baggage and equipment will be marked as prescribed in section III, War Department publication "Preparation for Overseas Movement" (POM).

g. Organizational trophies. Organizational trophies which may be authorized for retention by units in accordance with current instructions applicable to this matter may be returned with unit impedimenta, but will be boxed separately and containers clearly marked to indicate that they are organizational trophies.

h. Flags, colors, standards, and guidons. Flags, colors, standards, and guidons will be returned with the unit, will be packed in the manner prescribed in AR 260-10, and containers clearly marked to indicate contents.

i. Unit fund property (nonappropriated funds). Bulky items and other articles of unit fund property which it is not desirable to return to the United States, as determined by the oversea commander, will be disposed of as directed by the oversea commander and in accordance with AR 210-50. Unit fund property which is retained by the organization for return to the United States will be boxed separately and moved with the unit impedimenta. Each container will be clearly marked to indicate that the contents thereof are unit fund property and the organization to which it pertains.

j. Shipment of unit impedimenta. In all cases organizational records, colors, standards, and guidons will accompany the unit. Whenever practicable, subject to cargo space available, other unit impedimenta will also be carried on the vessel transporting the troops.

k. Weapons and ammunition. The clothing, equipment, and baggage of each individual will be carefully inspected prior to departure for detection of small arms and live ammunition. Weapons which are *not* the personal property of the individual and *all* live ammunition discovered will be withdrawn. The burden of proof as to ownership of weapons rests with the individual. In *no* case will live ammunition be retained by the individual.

17. Medical Processing.

a. Prevention of dissemination of disease.

Oversea commanders will take action to prevent the dissemination of communicable diseases as prescribed in WD Circular No. 276, 1943, or supersessions thereto. In order to comply with these provisions oversea commanders are specifically charged with the following responsibilities:

(1) Inspection of all personnel within 48 hours prior to embarkation for the purpose of discovering and treating suspects and cases of acute communicable diseases which, if introduced aboard the vessel, might reasonably be expected to result in an epidemic.

(2) Inspection of all personnel within 48 hours prior to embarkation for the purpose of discovering and treating suspects and cases of venereal disease. This inspection may be made at the same time as that required by (1) above.

(a) Individuals with primary and secondary syphilis, lymphogranuloma venereum, granuloma inguinale, and undiagnosed penile lesions will be detained and treated prior to embarkation. (See SGO Circular Letter No. 74, 25 July 1942, TB MED 106, 11 October 1944, and any supersessions thereto.)

(b) Individuals with gonorrhea, uncomplicated, and individuals with an undiagnosed urethral discharge will be embarked. Whenever possible, treatment should be initiated prior to embarkation and continued if necessary while aboard ship. (See TB MED 96, 21 September 1944, and any supersessions thereto.) A list of such individuals requiring treatment aboard ship will be provided the transport commander. These individuals will be placed aboard ship in such manner as to facilitate their identification and treatment.

(3) Disinfestation by approved methods of all vermin-infested persons, their clothing, and personal equipment prior to embarkation.

(4) Accomplishment of all immunization requirements of the command concerned and of the land areas to be traversed while en route.

(5) Provision to the transport commander (to be held available for examination by quarantine officers at foreign ports and for ultimate transmission to responsible commanders en route and at the final destination) of a certificate, substantially in the form indicated in appendix VIII, including the following (see par. 5d, AR 615-250, 24 July 1942, and par. 3b, WD Circular No. 276, 1943):

(a) A statement as to exposure to and incidence of infectious and parasitic diseases and vermin infestation for each group for which such a statement is practicable. When this is not possible, a brief statement of the significant prevalence of infectious and parasitic diseases and vermin infestation in the area(s) from which the returning personnel are drawn.

(b) A statement that all personnel have been physically inspected (giving the place and date of such inspection) and that they are free of vermin, venereal disease (except as noted in (2) (a) and (b) above), and of acute communicable disease, which, if introduced aboard the vessel, might reasonably be expected to result in an epidemic.

(c) A statement, based upon inspection of records by organization commanders, as to whether the requirements of AR 40-210 and other War Department and pertinent theater directives concerning special immunization have been met. The names of all individuals not so vaccinated will be given.

(d) A statement that all persons embarked, are free from quarantinable disease; namely, cholera, leprosy, smallpox, epidemic typhus, plague, and yellow fever. When such diseases are present, however, the names of all persons with quarantinable diseases will be listed as exceptions.

b. Physical profiling. A physical profile serial will be accomplished prior to the return of enlisted personnel from *inactive theaters* as required in paragraph 20, RR 1-1. In order that extended periods of observation of the individuals' physical condition and performance in the field may be given due considera-

tion in the interpretation of the physical findings of the examination and to conserve personnel, medical and dental officers assigned or attached to the unit being examined will perform the examinations, so far as is practicable.

18. Pre-Embarkation Report.

a. Five days prior to embarkation, each oversea commander will report by *Confidential* radio (book message) to The Adjutant General, Operations Branch (OB-I) and to the commander of the United States port at which debarkation is scheduled, the data indicated below. When practicable, these reports will be transmitted in the tabulated form indicated in *c* below.

(1) The current United States port serial number assigned to vessel.

(2) Code designation of each unit to be embarked and the identity of each unit.

(3) Code designation of each reception station group to be embarked.

(4) Strengths of units, groups, and other passengers to be embarked. In the case of category IV units, strength will be broken down by reception stations to which personnel are to be dispatched after arrival in the United States. Passengers other than those in units and groups will be shown by classification, i. e., USA Patients, US Navy, civilian, etc.

(5) The number of enlisted personnel in each unit and group with scores *above the critical score*. (See paragraph 12c, RR 1-1.) In the case of category IV units, this will be broken down by reception stations to which personnel are to be dispatched after arrival in the United States.

b. The following symbols will be used to identify classes of personnel in these reports and in those specified in paragraph 20 below: N—Negro; W—female; EM—enlisted men; EW—enlisted women; Off—Officers; Civ—Civilian; NU—Negro Unit.

NOTE.—Absence of a symbol for color indicates personnel are white; absence of symbol for sex indicates male personnel.

RR 1-2

c. Following is a sample radio in accordance with *a* above:

"IT IS EXPECTED THAT THE FOLLOWING WILL BE EMBARKED ON NAN
YOKE SEVEN TWO THREE:

USA 341 MHSP	2	17			19
USA 543 MHSP	5 (incl. 2 N)	32			37
Total on vessel					1,720"

d. It will be noted that the above report includes all personnel to be embarked on a vessel. It is not desired that separate reports be made for various categories of personnel to be embarked. Analysis of this report reveals the following with regard to personnel being *returned under Readjustment Regulations (RR 1-2)*:

- RE----- Represents European Theater of Operations.
- 101----- The one hundred first movement from this oversea command.
- 102----- The one hundred second movement from this overseas command.
- A----- The 14th Field Artillery Observation Battalion consisting of 506 members broken down by reception station destinations.

B----- The 567th Port Company, a Negro unit, consisting of 234 members broken down by reception station destinations.

RE102-2-- A reception station group consisting of 131 women scheduled for the Reception Station, Fort Dix, N. J.

e. The Adjutant General will provide distribution of the above reports and those required by paragraphs 19*b* and 20*a* to all agencies concerned.

f. Immediately upon receipt of the above report, the United States port commander will give warning notice by most expeditious means of communication available to each personnel center commander concerned and to Chief of Transportation, Attention: Traffic Control Di-

vision, indicating the anticipated numbers of personnel (broken down by officers, enlisted personnel, male, female, white, and Negro) to be moved to reception stations, the number of enlisted personnel with scores above the critical score and expected date of departure from the United States port. This is only a warning notice and is not to be confused with the actual clearance for movement to reception stations as contemplated by paragraph 31a.

19. Time of Movement and Sailing Report.

a. Actual movement from oversea commands to transportation facilities under the control of the Army Service Forces will be effected in accordance with schedules established by the oversea commanders concerned and the Chief of Transportation, Army Service Forces.

b. Not later than 24 hours after sailing, each oversea commander will report by *Secret* radio (book message) to The Adjutant General, Operations Branch (OB-I) and to the commander of the United States port at which debarkation is scheduled the following:

The United States port serial number currently assigned to the vessel.

Date of departure.

Expected date and time of arrival.

Following is a sample radio:

"NAN YOKE SEVEN TWO THREE
SAILED FIFTEENTH NOVEM-
BER FOR YOUR PORT ESTI-
MATED ARRIVAL TWENTY-

FIFTH NOVEMBER ZERO ZERO
THREE ZERO ZONE."

20. Embarkation Report and Passenger List.

a. (1) Within 24 hours after sailing, each oversea commander will report by Restricted radio (book message) to the United States port at which debarkation is scheduled and The Adjutant General, Operations Branch (OB-I) the actual personnel embarked on each vessel. Normally this report will include only the strength changes in the *pre-embarkation report*, if any, and statement as to baggage, special equipment, and health of passengers aboard. Baggage and special equipment will be shown by unit or group of personnel and stowage location on vessel. Unit identities will not be stated unless there has been a change in the units to be embarked. If for any reason it is necessary that a unit identity be included, the report will be classified *Confidential*.

(2) Following is a sample radio. (When practicable these will be dispatched in the tabulated form indicated.)

"NAN YOKE SEVEN TWO THREE
CARRIES PERSONNEL AS PRE-
VIOUSLY INDICATED IN PRE-
EMBARKATION REPORT RADIO
E FOUR FIVE SIX SEVEN EIGHT
DATED ONE SIX JANUARY ONE
NINE FOUR FIVE EXCEPT THE

Special Navy equipment.....	Hold #3.....	3 long tons.

All passengers free contagious disease and vermin."

(3) When the number of changes in the strength data reported in the pre-embarkation report are numerous, the personnel actually embarked will be completely retabulated in the embarkation report in the form indicated in 18c above, except that unit identities will not be stated, unless they have changed.

b. Passenger List. A passenger list, showing personnel embarked on a vessel will be prepared overseas in accordance with the provisions of AR 55-385, and TM 38-412. The list will be checked at the gangplank as the personnel embark. The stencils used for producing these lists will accompany the copies forwarded aboard ship in accordance with the above directives.

21. Control En Route.

Upon embarkation overseas, units and groups will pass to control of the Chief of Transportation, Army Service Forces, and will remain under his control until the personnel thereof are delivered at reception stations in the United States. However, strength accountability for this personnel will remain with the overseas command until date of arrival at a United States port. (See par. 9, sec. II, WD Circular No. 415, 1944.)

22. Diversions.

If, after embarkation, it is necessary to divert a vessel to a United States port other than that at which debarkation was originally scheduled, the Chief of Transportation (Movements Division) will notify the United States port commanders concerned.

23. Procedures Aboard Ship.

a. Physical inspection. Within 24 hours before scheduled debarkation, the ship surgeon will conduct a physical inspection of each individual to be debarked for the detection of acute communicable diseases, including venereal disease, and vermin infestation. Following the inspection a health certificate, substantially in the form indicated in appendix IX, which includes the information required by paragraph 25a, will be prepared and signed by the ship surgeon. This is of paramount importance in speeding up processing after debarkation. Further reference is made to changes No. 1, AR 55-435, 9 October 1944.

b. Customs requirements. The transport commander will execute the blanket declaration necessary for customs clearance, as required by WD Circular No. 335, 1944, as amended by section IV, WD Circular No. 31, 1945, and section III, WD Circular No. 75, 1945.

Section III

MOVEMENTS FROM UNITED STATES PORTS TO RECEPTION STATIONS

24. Arrival Reports.

a. In the case of *units only*, immediately after debarkation in the United States, port commanders will report by wire to The Adjutant General, Operations Branch (OB-I), indicating code designations (which conceal the identity of units) and arrival date. The Adjutant General will notify other War Department agencies concerned. Since the identity of units will not be given in the clear, these reports may be transmitted as Restricted.

b. Upon arrival at a United States port (disposition center or staging area) the commander thereat will, by interview with the unit and group commanders and by review of movement orders (roster section), determine any changes in personnel which have occurred since embarkation overseas. Any changes with regard to reception station destination of *officers*, as determined above or which may result from other circumstances, will be reported by wire immediately by the United States port commander to The Adjutant General, Attention: Officers Branch (PO-A).

25. Processing at United States Ports.

The Chief of Transportation will establish a uniform procedure for processing of personnel in units and groups to be accomplished at United States ports prior to departure for reception stations. Such processing will include—

a. Physical inspection and other measures necessary for prevention of disease. These include medical care, hospitalization, restriction of movements of individuals believed to be suffering from communicable (including quarantinable) diseases, and disinfestation of personnel, and baggage when necessary. Upon arrival of a vessel, the ship surgeon will turn over to the transport commander and to the

port surgeon a certificate which includes the following statements (See appendix IX):

(1) That all personnel aboard have been physically inspected, giving the date and hour of such inspection. The names of all individuals with communicable disease (including venereal disease) or quarantinable disease; namely, cholera, leprosy, smallpox, plague, epidemic typhus, and yellow fever, will be shown.

(2) That, during the voyage, the vessel did not enter a port in which there was present any quarantinable disease nor a port considered by the United States Public Health Service to be infected. However, if such entry has been made, it will be stated whether or not the actions of the vessel and personnel aboard while in port was such as to preclude the danger of acquiring quarantinable disease.

(3) That the sanitary condition of the vessel is satisfactory, its rodent colony is not excessive, and that it possesses a valid deratization or deratization exemption certificate. Exceptions will be stated.

A copy of this certificate, together with a copy of the certificate prescribed in paragraph 17*d*, will be held available for examination by quarantine officials at the port of arrival. In the event of entry without quarantine inspection by an officer of the United States Public Health Service, copies of the certificates will be forwarded within 24 hours to the Chief Quarantine Office of that Service in the port entered. The port surgeon will forward authenticated copies of these certificates to the staging area or disposition center concerned so that they will be in the possession of the staging area or disposition center surgeon prior to or at the time personnel arrive thereat. The provisions of WD Circular No. 276, 1943, and any supersessions thereto will be complied with. At the discretion of the port commander, the inspection conducted by the ship surgeon aboard ship prior to debarkation may be substituted for the inspection prescribed in paragraph 5*c*, WD Circular No. 276, 1943. However, when individuals remain in staging areas or disposition centers more than 72 hours after the inspection prescribed in paragraph 23*a* another physical inspection will be made at the

staging area or at the disposition center. Upon departure from the staging area or disposition center, each group leader will be furnished a certificate, pertinent to all members of the group, to be delivered to the reception station commander. This certificate will contain abstracts of the above-mentioned statements of exposure to parasitic and infectious disease and a statement as to the present health of the individuals.

b. Venereal disease. Individuals with primary and secondary syphilis, gonorrhea, lymphogranuloma venereum, granuloma inguinale, and undiagnosed penile lesions will be treated prior to transfer to reception stations. Individuals with gonorrhea should be asymptomatic and bacteriologically negative (smear or culture) prior to transfer to their next station.

c. Customs inspection, where necessary, as prescribed in WD Circular No. 335, 1944, as amended.

d. Personnel records. In the case of reception station groups organized overseas, action will be limited to ascertaining whether or not records of each individual have been returned. In the case of personnel received in units to be demobilized, appropriate entries will be made in service records as required by current regulations. (See par. 11, RR 1-6.) The records prescribed in paragraph 15*b* (1) will accompany personnel upon movement from United States ports.

26. Demobilization of Units.

All category IV units, whether Army Ground Forces, Army Air Forces, or Army Service Forces type received at disposition centers for demobilization will be demobilized by the Commanding General, Army Service Forces, in accordance with specific directives to be issued by the War Department for each unit. Procedure for the demobilization of category IV units is contained in RR 1-6.

27. Organization of Reception Station Groups.

a. Organization. Upon demobilization of units at port disposition centers, personnel from such units will be formed into reception station groups in the same manner as prescribed in paragraph 11, including provision, if necessary, of escort and medical personnel. When several units are being demobilized at a disposition

center at the same time, the personnel from all such units who are destined for the same reception station may be consolidated and formed into a single group, consistent with time available and other circumstances.

b. Code designations. Each group organized at a port disposition center will be assigned a code designation composed of characters as follows:

(1) The first character will be the code letters of the United States port disposition center from which the group is moving (see appendix I) and the successive movement number assigned to the group by the port commander. The first group formed at a port disposition center will be numbered 1; the second numbered 2; and consecutive numbers will be assigned for each succeeding group which is formed, irrespective of the reception station for which they are destined.

(2) The second character will be a dash.

(3) The final character will be the code number of the reception station.

(4) Following is an example of a code designation prepared in accordance with the above:

NYKI-7. This is the first group to be moved from the Disposition Center, Camp Kilmer, N. J., New York Port of Embarkation. This group is destined for the Reception Station, Fort Sheridan, Ill., and consists of personnel entitled to transportation to addresses in the states served by that reception station.

28. Movement Orders.

a. Reception station groups organized overseas.

(1) Upon receipt of the No. 1 stencils (advance) of the overseas movement order, the United States port commander will produce such quantities of the order as may be required for planning purposes at the port. The stencils will then be placed in self-cleaning file folders, and together with one copy of the order produced therefrom, will be dispatched by the most rapid means of transmission, to the reception station for which the personnel are destined.

(2) Unless local circumstances dictate otherwise, it will not be necessary for the port commanders to issue new orders for movement of reception station groups (organized overseas) to reception stations. Upon arrival of the per-

sonnel at the United States port (staging area), the No. 2 stencils (clean) of the group movement order will be secured from the group leader. The United States port commander will prepare the appropriate indorsement transferring the personnel to the proper reception station. This can be accomplished by typing directly on the No. 2 stencils, if there is space, or on a new stencil. When sufficient copies of the order and indorsement have been reproduced for port requirements, the stencils (order and indorsement) will be given to the group leader for delivery to the proper authority at the reception station. Indorsement by the port commander on the orders initiating movement from overseas will provide the following information:

(a) Date of arrival at the port.

(b) Listing of those individuals in the movement order who did not arrive as scheduled (if reason for nonarrival cannot be determined, the oversea command from which the movement originated will be notified promptly).

(c) Statement directing movement to appropriate reception station. (See appendix I.)

(d) In the case of escort personnel designated for return to oversea station, the indorsement of the port commander on the orders will indicate that recuperation period is to be granted upon completion of escort duty and will indicate that such personnel is to return to the same or another port upon expiration of recuperation period for return to oversea station.

(e) Statement as to disposition of any personnel, such as individuals hospitalized upon arrival, who will not proceed to reception stations.

(f) Allotment number to which travel is chargeable.

(g) Statement indicating whether travel is in connection with permanent change of station or temporary duty and whether travel is with troops. (See WD Cir. No. 260, 1944, as amended by sec. I, WD Cir. No. 433, 1944.)

(3) Distribution of orders (produced from the No. 2 stencils) and the port indorsement will be made by the United States port commander, by most rapid means of transmission, as follows:

Two copies to Chief of Transportation, Army Service Forces (Movements Division).

One copy to The Adjutant General, Operations Branch (OB-I).

One copy to The Adjutant General, Officers Branch (PO-A).

Twelve copies to reception station commanders concerned to arrive prior to the personnel (only when the No. 1 stencils, due to unforeseen circumstances, cannot be forwarded to the reception station).

Two copies to each group leader, for delivery to the reception station commander, accompanying the No. 2 stencils. (This is in addition to any required for personal use of individuals.)

(4) If new orders are issued at the port similar distribution will be made.

b. Reception station groups organized at United States ports. (See appendix IV.)

(1) For reception station groups organized at port disposition centers upon demobilization of units, orders directing movement to the appropriate reception station will be issued by the United States port (disposition center) commander. Such orders will be prepared in two sections containing the following information:

(a) Directive.

1. The command which issued the orders.

2. Code designation for each group as prescribed in paragraph 27b.

3. The reception station to which each group is to proceed. (See appendix I.)

4. Disposition of escort and medical personnel not scheduled for reassignment or separation.

5. Allotment number to which travel is chargeable.

6. Statement indicating whether travel is in connection with permanent change of station or temporary duty, and whether travel is with troops. (See WD Cir. No. 260, 1944, as amended.)

(b) Personnel roster. Data prescribed in paragraph 13b. (This will be provided as a separate annex or inclosure to the directive, produced from stencils furnished by the overseas command on which will be entered the code designation assigned by the United States port.)

(2) The No. 1 stencils of the personnel roster (used—received from overseas in advance) will be used to provide advance distribution to reception stations. The United States port commander will produce from the No. 1 stencils such quantities of the roster as may be required for planning purposes at the port. The stencils will then be placed in self-cleaning file folders and, together with one copy of the orders produced from the No. 1 stencils, will be dispatched by most rapid means of transmission to the reception station concerned.

(3) In order to obviate the necessity for retyping the voluminous personnel data referred to in (1) (b) above, the No. 2 stencils of the personnel rosters will be used for this purpose. The port commander will prepare a directive in which will be stated the information required in (1) (a) above, with a statement indicating that the required personnel data is contained in personnel roster attached. The port commander will produce the quantities of the movement order (directive and roster) as may be required locally and for the distribution indicated in a (3) above. The No. 2 stencils for the movement order (directive and roster) will then be given to the group leaders for delivery to the appropriate reception station commanders. Each stencil will be protected by a self-cleaning file folder.

(4) It is contemplated that amendments of orders will not be necessary since it will be possible to effect any necessary changes by correction of stencils. However, if amendments are necessary, the stencils therefor will be given to the group leader for delivery to the proper reception station, or, if prepared after departure of the personnel, will be forwarded to the proper reception station.

c. Units. United States port commanders will make distribution of movement orders of units received from overseas to The Adjutant General and Chief of Transportation, Army Service Forces, as specified in a (3) above. These will be produced from the No. 2 stencils of the unit movement orders delivered by the unit commander.

29. Clothing and Equipment.

a. (1) Organizational equipment as prescribed in appendix VI, except the items listed

below, will accompany reception station groups (whether organized overseas or at United States ports) from the United States port to reception stations. Necessary issues will be made to provide each group with the authorized allowances of equipment. Upon arrival at a United States port the following items will be withdrawn from reception station groups organized overseas.

Desk, field, empty, fiber, complete.
Typewriter, portable, w/carrying case.
Perforator.

(2) Accountability for equipment carried by each group to a reception station will be transferred to the appropriate supply officer of the station to which the group is destined. The group leader will sign for the equipment and will be responsible for its care during the period of travel. The equipment will be turned in to the new accountable property officer immediately upon arrival at destination. An appropriate shipping document will be issued at the United States port, listing the equipment involved; the name, rank, and serial number of the group leader who is responsible for the property; and the station supply officer to whom accountability is transferred. One copy of the shipping document will be mailed to the appropriate station supply officer and two copies will be given to the group leader for delivery to the supply officer. Upon turn-in of property at destination, one copy of the document receipted by the supply officer will be returned to the group leader to relieve him of responsibility.

b. Enlisted personnel will be provided clothing and equipment as prescribed in WD Circular No. 72, 1945. Show-down inspections for clothing and equipment will not be performed at United States ports. Processing of clothing and equipment of individuals will be limited to procedure outlined in WD Circular No. 72, 1945.

30. Movement Within Port Area.

Actual movement within the port area (to staging areas or disposition centers) will be controlled by the United States port commander concerned, under current Army Regulations.

31. Movement to Reception Stations.

a. **Clearance for movement.** Actual movement from United States ports to reception stations will be scheduled, so far as is practicable, so as to permit the departure of reception station groups (whether organized overseas or at disposition centers) within 48 hours after debarkation, subject to availability of transportation and housing capacity at reception stations. No movement will be made to a reception station without specific authority from the commander of the personnel center of which the reception station is a part. The United States port commander will notify the personnel center commander by means of communication expedient under the circumstances. Such notification will indicate the code designation and the strength of each group. The group strength will be broken down by officers, enlisted personnel, female, and Negro personnel. Personnel center commanders will grant port commanders *immediate clearance for movement*, or, in those cases where clearance cannot be given, will so inform the port commander indicating reason why clearance cannot be granted. If conditions are such that clearance cannot be obtained, the facts will be reported by telephone by the port commander to the Chief of Transportation (Movements Division). Upon request from the Chief of Transportation, the Director, Mobilization Division, Army Service Forces, will issue appropriate instructions regarding disposition of the groups concerned. Each clearance granted for movement to a personnel center involving 40 or more individuals will be reported immediately by the personnel center commander by wire communication to Chief of Transportation, Attention: Traffic Control Division. Such report will include information to indicate the personnel center which granted clearance, the port to which clearance was granted, the number of individuals in the group, and estimated date movement to the personnel center will commence. Whenever practicable, the actual clearance and this report will be made by means of a book message addressed to the port commander concerned and Chief of Transportation (Traffic Control Division).

b. Report of departure. The departure of reception station groups will be reported by wire by the port commander to personnel center commanders, immediately after the departure of such groups, giving the following information:

- (1) Code designation of group.
- (2) Strength of group broken down by various categories, as indicated in *a* above.
- (3) Train main or motor convoy number, when applicable.
- (4) Train number (if a regularly scheduled train.)
- (5) Estimated time and date of arrival.
- (6) Estimated time and date last meal will be served aboard train.
- (7) Common carrier which will deliver personnel at railhead of the receiving installation. (Indicate name of railroad, bus line, or Government motor transportation as applicable. If travel is by regularly scheduled commercial transportation, state train or bus number.)

c. Report by train or convoy commander of delay en route or change in time of arrival. The train or motor convoy commander will report to the reception station commander by wire or other expeditious means of communication any substantial deviation from, or delay in, schedule reported in accordance with *b* above. Such notification will include the following information:

- (1) Code designation of group.
- (2) Expected time and date of arrival.
- (3) Strength of group.
- (4) Main number (when applicable).
- (5) Train number (if a regularly scheduled train).
- (6) Time and date last meal will be served aboard train.

d. Report by group leader. In cases where groups are traveling separately and not under the supervision of a train or convoy commander, the report required in *c* above will be made by the group leader.

e. Instructions to train commanders, convoy commanders, and group leaders. United States port commanders will instruct train commanders, motor convoy commanders, and group leaders as to their responsibilities while enroute to reception stations. Special emphasis will be placed upon the control and discipline

of personnel while enroute and the reports required by *c* and *d* above. The duties and responsibilities of train commanders are set forth in WD Pamphlet No. 20-7, Troop Train Commanders Guide.

Section IV TRAVEL BY AIR

32. General.

Except where specifically indicated otherwise in this section, or where obviously inapplicable, the requirements of these regulations will apply to the movement of individuals returning to the United States by air transportation for ultimate reassignment or separation from active service, except that they will be returned *as individuals on individual orders without assignment of group designations and without formation into groups.* The mode of transportation by which any individual is to be moved to the United States is a matter of decision by the oversea commander, or his designated representative, within the limitations imposed by available air transportation. Air transportation for individuals specified in paragraph 6*a* (3), will be arranged in accordance with the procedure agreed upon between the oversea commander and the theater representative of the Air Transport Command in compliance with the provisions of section I, WD Circular No. 130, 1944. Individuals whose presence is likely to be prejudicial to the health of others because of being in the contagious phase of a communicable disease or because of vermin infestation will not be returned by air. Individuals with primary and secondary syphilis, gonorrhea, lymphogranuloma venereum, granuloma inguinale, and undiagnosed penile lesions will be treated prior to return by air. Individuals with gonorrhea should be asymptomatic and bacteriologically negative (smear or culture) prior to transfer. Individuals will be assembled at points designated by the oversea commander and will be given preliminary processing as prescribed for members of units and groups. Personnel will be moved from such points to the port of aerial embarkation in accordance with procedure agreed upon between the oversea commander and the theater representative of the Air Transport Command.

33. Personnel Records.

a. Personnel records pertaining to the individual, as indicated in paragraph 15b (1), will be posted up-to-date and turned over to the individual concerned. The individual will be impressed with the importance of retaining such records in his personal handbaggage so as to be immediately available when called for by proper authority. Placing such records in barrack bags or other baggage which may be shipped separately is not considered as "in the personal handbaggage of the individual."

b. In the case of officers, advance copies of orders and WD AGO Forms 66-2, 66-3, and 66-4 will be furnished by the oversea commander to The Adjutant General, attention: Officers Branch (PO-A), as prescribed in paragraph 15b (3), except that they will be dispatched at least 5 days prior to departure of the officers.

34. Baggage.

a. Officers. Every effort will be made to limit authorized personal baggage to the absolute minimum weight. Travel orders will include the authorized baggage allowance. In the absence of such limitations in the travel orders, the maximum baggage allowance will be limited to 65 pounds (sec. I, WD Cir. No. 122, 1944).

b. Enlisted personnel. Only the minimum clothing and equipment sufficient for comfort and security of the individual during the return movement will be provided, in accordance with allowances prescribed in WD Circular No. 72, 1945. The C and E Adjustment Form pertaining to clothing and equipment will be provided for each individual and each WD AGO Form 32 will be closed out as prescribed in WD Circular No. 72, 1945. Unless specifically authorized for transport by air, in no case will baggage of individuals returning by air exceed the current authorized weight allowance (sec. I, WD Cir. No. 122, 1944). Travel orders will include the authorized baggage allowance.

c. Processing. The provisions of the War Department publication, "Processing of Baggage from Overseas," which outlines instructions governing the processing of baggage carried by individuals, are applicable to return by air.

d. Unaccompanied baggage. Baggage of individuals in excess of the weight allowance authorized for movement by air will be properly packed, marked, and shipped to the United States as unaccompanied baggage under the provisions of War Department publication, "Processing of Baggage from Overseas." In cases where the consignee address of the baggage is not known by the individual, he will be given a copy of the "Notification" prescribed in section I, WD Circular No. 22, 1945.

35. Orders.

a. Preparation. Separate travel orders will be issued by oversea commanders for each individual to be returned to the United States by air. Several individuals may be placed on one order provided each individual is given the number of copies required by c below.

b. Contents of orders. These orders will indicate for all personnel:

(1) The oversea command from which the individual is moving.

(2) The following information concerning the individual: Grade, name, serial number, arm or service, military occupational specialty number, Adjusted Service Rating score, and address to which individual is entitled transportation upon separation.

(3) The reception station to which the individual is to be moved after arrival in the United States. The address in the United States to which the individual is entitled transportation upon separation from the service will be the basis for this determination. (See appendix No. I.)

(4) Authority for return (i. e., reference to these regulations).

(5) Permanent change of station.

(6) Maximum baggage allowance permitted for travel by air.

(7) Authority for travel by air.

(8) Theater Air Priority Designator.

(9) Statement that the individual will move on or about _____ from present over-

(date)

sea station to a United States airport and will be subsequently directed to move, by indorsement by the commander of the United States airport at which debarkation is effected in the United States, to the reception station designated in the orders.

(10) Statement that the individual will be under the control of the Commanding General, Air Transport Command, from time of arrival at the overseas Air Transport Command airport until released at the United States airport.

(11) Per diem or other allowances, as authorized by Army Regulations.

c. Distribution.

(1) Twenty copies of travel orders, and amendments thereto, will be given to the individual performing the travel for his use and to permit distribution upon arrival in the United States as follows:

Two copies for United States airport concerned.

Two copies for the reception station commander concerned.

One copy for the The Adjutant General, Operations Branch (OB-I).

One copy for The Adjutant General, Officers Branch (PO-A).

(2) For each officer being returned by air the overseas command will furnish The Adjutant General, Officers Branch (PO-A), an advance copy of the travel orders in the same manner as provided for unit and group orders in paragraphs 14b, and 15b (3) (see also par. 33b).

d. Disposition. Upon arrival in the United States, the commander of the entry airport will indorse the travel orders to indicate date of entry into the United States and direct travel to the appropriate reception station, unless instructed otherwise. Sufficient copies of the orders will be withdrawn to make distribution as provided in c above.

(1) If the individual concerned has no specific mission to perform, orders will be indorsed to direct travel to the reception station indicated in the basic orders. Care will be exercised that female personnel are transferred only to stations designated to receive female personnel. (See appendix I.)

(2) If the individual concerned has a special mission to perform, orders will be indorsed to direct travel to the place of duty, with a request that after performance of the mission involved, the individual be moved to the *named* reception station for disposition.

36. Travel by Water and Air.

In the event the original travel orders provide for a combination of air and water transportation or vice versa, or if circumstances en route to the United States necessitate a change in mode of transportation, the following action will be taken:

a. Where the journey has been initiated by water and will be completed by air, the en route water port commander will indorse the original orders, to require travel to an airport, and transfer the personnel involved to the jurisdiction of the Air Transport Command representative concerned, for resumption of the journey to the United States by first available air transportation.

b. Where the journey has been initiated by air and will be completed by water, the Air Transport Command commander at the en route airport will indorse the original orders, to require travel to a water port and transfer the personnel involved to the jurisdiction of the water port commander concerned. The Chief of Transportation in the overseas command concerned will arrange for resumption of the journey by first available water transportation.

37. Responsibilities of Commanders of United States Airports.

a. Comply with United States border clearance requirements and the provisions of paragraph 5, WD Circular No. 276, 1943, and supersessions thereto.

b. Indorse orders, indicating date of arrival at the port and directing travel of individuals to proper reception stations. (See par. 35d)

c. Forward personnel to reception stations with the least possible delay after minimum processing, subject to clearance by personnel centers in the manner prescribed in paragraph 31a. Individuals with primary and secondary syphilis, gonorrhea, lymphogranuloma venereum, granuloma inguinale, and undiagnosed penile lesions will be treated prior to transfer to reception stations. Individuals with gonorrhea should be asymptomatic and bacteriologically negative (smear or culture) prior to transfer to their next station.

Section V

RETURNS FROM CANADA

38. General.

Except as *modified* below, the procedures prescribed in other sections of these regulations are *applicable* to returns, under the readjustment plan, from Canada to the United States. Personnel will be returned as members of units and groups or as individuals, as prescribed for movements from other commands. Advance copies of orders and WD AGO Forms 66-2, 66-3, and 66-4 for officers will be furnished The Adjutant General, attention: Officers' Branch (PO-A) as prescribed in paragraphs 14b and 15b (3).

39. Movements by Water.

Movements by water will be effected in the same manner as prescribed for readjustment movements from other overseas commands.

40. Movements by Rail.

Movements by rail will be effected in accordance with procedures contained in section II, as modified below.

a. Movement of Units. In instances where readjustment plan movements from Canada to the United States are to be effected by rail, category IV units will move direct to posts, camps, or stations which will be designated by the Director, Mobilization Division, Army Service Forces (in conjunction with the major command concerned), *upon receipt of notification from the commander at foreign station that units have been completely readjusted and are prepared for movement.* Therefore, upon completion of preparation of category IV units for movement, the commander of foreign station will notify the Director, Mobilization Division, Army Service Forces, and request designation of a station in the United States.

b. Movement of groups. Groups to be returned by rail will be organized in the same manner as prescribed for similar groups returning from other overseas commands, but will move direct from foreign station to the appropriate reception station.

c. Code designations.

(1) Each *group* will be assigned a code designation by the overseas commander in the

same manner as prescribed for movements by water.

(2) Each *unit* will be assigned a code designation by the overseas commander in the same manner as prescribed for movements by water, except that a number representing the installation designated to receive the unit will be added to the final character. This number will be furnished by the Director, Mobilization Division, Army Service Forces, at the time the installation is designated to receive the unit. For example, a code designation "RT2-A9A; B7E" would indicate the second movement from the United States Army Forces in Central Canada, consisting of two units moving direct by rail to specially designated installations in the United States.

d. Movement orders. Prior to departure of each unit or group, the *oversea commander* will make distribution of movement orders (directive and roster) to the unit or group commanders and *direct* to other agencies by the most expeditious means of transmission available, as follows:

Two copies to each unit or group commander (with No. 2 stencils—see *e* below).

Two copies to Chief of Transportation, Army Service Forces (Movements Division).

One copy to The Adjutant General, Operations Branch (OB-I).

One copy to The Adjutant General, Officers Branch (PO-A) (by air courier or air mail—see pars. 14b and 15b (3)).

e. Disposition of dual stencils.

The No. 1 stencils of the movement order (directive and roster) will be forwarded by air courier or air mail to the reception station or to the station designated to receive a unit, as appropriate. The No. 2 stencils will be forwarded to the same destination in custody of the unit or group commander. See paragraph 14 for additional details concerning preparation and handling of the stencils.

f. Clearance for movement. When movement is to be made by rail direct to posts, camps, stations, or reception stations in the United States, clearance for movement will be arranged by communication between the commanders concerned in Canada, and the instal-

lations in the United States, in the same manner as prescribed for movements from United States ports to reception stations in paragraph 31a.

g. Rail transportation. Rail equipment and routings will be procured through the Chief of Transportation, Army Service Forces, in the same manner as currently in effect for other movements by rail from Canada to the United States.

h. Predeparture report. Five days prior to departure, report will be made by the oversea command to The Adjutant General, OB-I, and the stations designated to receive units or groups, furnishing information indicated in paragraph 18 as applicable. Changes will be reported at time of departure in the manner prescribed in paragraph 20.

i. Departure report. Actual departure will be reported to the station designated to receive a unit or to the reception station concerned. This report will provide the information indicated in paragraph 31b and will include *the scheduled date of crossing the International Boundary*.

j. Report by train commander or group leader. During all rail movements from Canada direct to posts, camps, stations, or reception stations in the United States, the train commander or group leader will comply with paragraph 31c and d.

k. Instructions to train commanders and group leaders. The oversea commander will instruct train commanders and group leaders as to their duties and responsibilities. (See par. 31e.)

l. Arrival report. For units returned from Canada by rail, paragraph 24 is modified to provide that the commander of the station which receives the unit will notify The Adjutant General.

41. Demobilization of Units at Posts, Camps, and Stations.

When a unit returning from Canada by rail arrives at the installation designated in accordance with paragraph 40a, the commanding general of the major force concerned will be responsible for prompt demobilization of the unit upon arrival at the station. (See also RR1-6, particularly par. 8a.) The personnel

therefrom will be moved to reception stations in the manner prescribed for United States ports (disposition centers) in section III. The code designations of such groups will be prepared in accordance with paragraph 27b, except that the first character will be the code number furnished by the Director, Mobilization Division, Army Service Forces, to represent the station (such as 9A, 7E, and so forth). For example, the first movement from a station designated for this purpose to the reception station at Fort Sheridan, Ill., might carry a code designation of 9A1-7.

Section VI

REPATRIATION OF TERRITORIAL UNITS AND TERRITORIAL PERSONNEL

42. General.

Territorial units designated for demobilization and surplus territorial personnel will, when normal shipping routes permit, be returned for disposition direct to the theater in which their home land is located. When this is not practicable, return will be effected by transshipment through the United States. Territorial personnel surplus to the new troop bases of oversea commands will not be designated essential or nonessential in the continental United States or in oversea theaters *other than the theater in which the territory of residence is located*. Designation of essentiality or nonessentiality will be made upon arrival in the theater of residence.

43. Return of Territorial Units.

a. Preparation for movement. Territorial units designated for demobilization will be prepared for movement in the same manner as prescribed in section II for units returning to the United States, including the prescribed medical processing, provision of prescribed clothing and equipment, and perfection of records. Attention is directed to paragraph 14a, RR 1-1, which states that such units will be returned to the appropriate territory or possession for demobilization *exclusive of those individuals whose homes are in the United States*.

b. Movement procedure.

(1) When a territorial unit is to be transshipped through the United States, movement to the United States will be effected in accord-

ance with the procedure contained in section II. However, in such case the report prescribed in paragraph 18 will indicate the territorial origin of the unit. For example: "RN53-A (65th Infantry—Puerto Rico)." Upon arrival of the unit in the United States, movement from the United States port to the appropriate territory or possession will be effected in accordance with specific directive to be issued in each case by the War Department.

(2) When territorial units are to return direct to the appropriate territory or possession, movement will be effected in accordance with section II, as modified below. Terms used in section II, such as "US port," "arrival in the United States," and so forth, will be interpreted to refer to "port in theater of destination," "arrival in theater of destination," and so forth, in connection with the movement of territorial units under this section.

(a) Each unit will be assigned a code designation in accordance with paragraph 12, except that the code letters representing the theater to receive the shipment will be added in parentheses immediately following the number of the movement. For example: RE103 (RC)-F would represent the movement of a category IV unit from the European Theater of Operations direct to the Caribbean Defense Command.

(b) Movement orders (see par. 14), which would normally be furnished a United States port commander, will be forwarded to the place designated by the oversea commander who is to receive the unit. The Adjutant General will also be furnished copies of the orders as prescribed.

(c) The reports required by paragraphs 18, 19, and 20 will be submitted to the commander of the theater of destination in addition to the commander of the port at which debarkation is scheduled and The Adjutant General, Operations Branch (OB-I). The commander of the port at which debarkation is effected will submit the report of arrival of the unit as indicated in paragraph 24, to The Adjutant General, Operations Branch (OB-I), and to the commander of the theater in which the unit is debarked.

c. The provisions of WD Circular No. 335, 1944, with regard to customs clearance of individuals will be complied with by the theater

making shipment. Where applicable, the provisions of that circular will also be complied with in theater of destination. In addition, where necessary due to local laws and regulations, the commander of theater of destination will prescribe action to be taken with regard to customs clearance upon debarkation of the personnel.

d. Disposition in theater of destination. Upon arrival of the units in theater of residence, such units will be moved for demobilization to a place designated and in the manner prescribed by the theater commander. Demobilization of such units will be effected only in accordance with specific directives to be issued by the War Department. Demobilization will be effected in accordance with procedure contained in RR 1-6.

44. Repatriation of Surplus Territorial Personnel.

a. Return in units. Whenever possible, surplus territorial personnel will be returned to the theater of residence as members of or attached to territorial units designated for demobilization. When this is not practicable, return to the territory of residence will be effected in accordance with succeeding subparagraphs.

b. Surplus territorial personnel stationed in continental United States.

(1) *Individuals other than those in patient status.*

(a) Surplus territorial personnel serving in the continental United States, except those in a patient status, who are to be repatriated and who cannot be returned to the theater of residence in category IV units, will be reported by the post, camp, or station commander concerned, to The Adjutant General for issuance of orders. Reports on enlisted personnel will be addressed to The Adjutant General, attention: Enlisted Branch; reports on officers will be addressed to The Adjutant General, attention: Officers Branch. Such reports will contain all essential data.

(b) The Adjutant General will issue orders for movement overseas using the destination number currently prescribed for the oversea command concerned. Copies will be furnished the station, port, and oversea commanders concerned. Such orders will direct:

1. Movement to the appropriate United States port of embarkation upon call of the port commander.
2. Movement from the United States port of embarkation to the territory of residence by transportation to be furnished by the port commander.
3. Disposition after arrival in the territory of residence.

(c) Upon receipt of orders and call by the port commander, the station commander will transfer the individual promptly to the appropriate port of embarkation. The records of the individual concerned will be carefully checked to determine that they are accurate, complete, and up-to-date when forwarded to the port commander.

(d) The port commander will arrange transportation and move the individual, together with properly completed records, to the territory of residence. The oversea commander having jurisdiction over the territory of residence will effect reassignment or separation and arrange for transportation of the individual to such point as he may be entitled.

(2) Individuals in a patient status. Territorial personnel who are in a patient status at the time they are designated for repatriation will be handled in the same manner as prescribed in (1) above, except—

(a) The report of the station commander or commanding officer of a general hospital will be submitted through The Surgeon General to The Adjutant General (Enlisted Branch or Officers Branch, as appropriate) and will contain a complete statement as to the patient's condition together with clinical diagnosis.

(b) The Surgeon General will designate a hospital in the vicinity of the port of embarkation to which the patient will be transferred pending availability of transportation for movement from the port to territory of residence.

(c) Upon arrival in the theater of residence, the individual will be given such additional hospitalization as may be necessary at a facility designated by the theater commander, and upon completion of such hospitalization, will be reassigned or separated as directed by the theater commander.

(3) *Travel orders.* Copies of travel orders for movements covered by (1) and (2) above will

be furnished the commanding general of the port of embarkation as far in advance of the movement of the individual as is possible.

(4) *Baggage allowance.* Clothing and baggage of personnel moved in accordance with (1) and (2) above will be limited as prescribed in current regulations.

c. Territorial personnel serving in a theater having jurisdiction over their territory of residence. Territorial personnel who, at the time they are declared surplus, are serving in a theater having jurisdiction over their territory of residence will not be shipped to the United States for determination of essentiality or non-essentiality. Determination in these cases will be made in the theater. Instructions as to disposition of surplus essentials will be furnished by the War Department upon request by the theater commander. Surplus nonessentials will not be transshipped through the United States but will be transferred from the bases or other theater installations at which they are serving direct to the territory of residence for separation and return to their homes. Movement will be effected by normal facilities available to the theater commander.

d. Territorial personnel serving in oversea commands other than theater having jurisdiction over territory of residence.

(1) *Direct movement.* Whenever practicable and when normal shipping routes permit, surplus territorial personnel serving in oversea commands other than the theater of residence will be moved *direct* to the territory of residence for disposition. Such movements will be effected in accordance with current procedures governing movement of casualties between theaters. Upon arrival in the theater of residence, the theater commander concerned will determine essentiality or nonessentiality and, in the case of nonessentials, effect separation and arrange for transportation of the individual to such point as he may be entitled. Surplus essentials will be disposed of as directed by the War Department.

(2) *Transshipment through United States.* Surplus territorial personnel to be repatriated, who are serving in oversea commands and who cannot be moved *direct* to the theater of residence either as members of territorial units or as casualties, will be moved to the United States

as members of category IV units or reception station groups. Individuals in this category who are moved to the United States will be assigned to those groups destined for the reception stations, Camp Shelby, Miss. (No. 5), or Camp Beale, Calif. (No. 14). Individuals returned to the United States who are to be transshipped to the Caribbean Defense Command will be assigned as members of those groups which are destined for Reception Station No. 5. Individuals returned to the United States for transshipment to Hawaii, Alaska, and other territories served by west coast ports will be assigned as members of groups destined for Reception Station No. 14. Upon arrival of this personnel at reception stations, disposition will be effected in accordance with *b* above.

Section VII

READJUSTMENT MOVEMENTS ORGANIZED FROM PERSONNEL STATIONED IN UNITED STATES

45. Scope.

This section deals exclusively with readjustment movements of *personnel stationed in the United States* and is *not* applicable to personnel returning from overseas.

46. Definitions.

a. Installations. As used in this section, the term "installation" refers to posts, camps, and stations, including class III and IV stations.

b. Separation groups. The term "separation groups" is defined in paragraph 3*u*. Groups of nonessentials which are moved to designated installations by service commanders for purposes of consolidation as directed in paragraph 56, will not be considered as separation groups, nor will they be organized or moved as such. Such personnel will be moved to the stations for consolidation in accordance with current directives applicable to other types of movements within the United States.

47. Plan of Movement.

Upon receipt of instructions from proper authority directing the release of nonessentials and upon receipt of instructions regarding disposition of surplus essentials, commanders of installations in the United States will arrange movements of personnel as follows:

a. Nonessentials. Nonessentials will be moved as separation groups to appropriate separation centers.

b. Surplus essentials. Surplus essentials will be disposed of as directed by the major command concerned. Such personnel will not be moved to reception stations as provided for personnel returned from overseas. Movement of this personnel will be arranged in accordance with current directives applicable to other types of movements within the United States.

48. Organization of Separation Groups.

a. Each separation group will be composed exclusively of personnel moving to the same separation center. These groups will be organized by station commanders as follows:

(1) Ascertain the address in the United States to which, under current laws and regulations, each individual is entitled transportation upon separation from active service.

(2) Determine the separation center, of those listed in appendix I, list D, serving the designated address. In determining the appropriate separation center to which individuals are to be moved, the designation of particular States or parts of States to be served by a separation center will be adhered to strictly.

(3) Assign individuals to groups assuring that all members assigned to a particular group are destined for the same separation center. Care will be exercised that female personnel are placed in separation groups destined only for separation centers designated to receive female personnel.

b. Post, camp, and station commanders are authorized to grant exceptions only as follows:

(1) An individual may be moved *in a separation group to a separation center other than the one designated* to serve the area to which he is entitled transportation upon separation when—

(a) This will eliminate a great amount of back travel and will not cause separation of the individual to be effected at a great distance from his home. For this purpose 200 miles or more will be considered a great amount of back travel and 500 miles or more will be considered as a great distance from the individual's home.

(b) The individual presents satisfactory evidence of a permanent change of residence and

separation in the vicinity of current assignment will prevent unnecessary travel.

(c) The individual presents satisfactory evidence of an offer of employment and separation near current assignment is necessary to prevent a substantial delay in separation and to prevent unnecessary travel.

(2) Individuals may be moved *on individual travel orders to the separation center nearest current assignment* rather than the one designated to serve the area to which the individual is entitled transportation when—

(a) The dependents and household goods of the individual are located near the place of assignment and it is necessary that the individual accompany the dependents to the place of residence.

(b) Travel to the separation center and subsequently to place of residence is to be performed by privately owned vehicle.

c. Escort personnel.

(1) Each separation group will be assigned officer and noncommissioned officer supervisory personnel in the same manner as provided in paragraph 11 for reception station groups.

(2) Medical personnel, as deemed necessary by the station commander and subject to availability of personnel within the command, will be assigned to accompany separation groups, as prescribed for reception station groups in paragraph 11.

49. Code Designations.

a. Each separation group will be assigned a code designation prepared as follows:

(1) The first character will consist of the number of the service command in which the installation is located, a letter assigned by the service command identifying the installation from which movement is being effected, and the successive number of the movement from the station.

(2) The second character will be a dash.

(3) The final character will consist of the code number of the separation center to which the group is destined. (See appendix I, list D.)

b. Following are examples of code designations prepared in accordance with the above:

(1) Assuming that the Fifth Service Command has assigned the letter "A" to Fort Knox,

Ky., for readjustment movements; that this is the first readjustment movement from Fort Knox; and that the group is moving to Fort Sheridan, Ill., the code designation issued by Fort Knox would be 5A1-32.

(2) Similarly, assuming that the Ninth Service Command has assigned the letter "D" to Camp Cooke, Calif., for readjustment movements; that this is the twelfth readjustment movement from Camp Cooke; and that the group is destined for Camp Atterbury, Ind., the code designation issued by Camp Cooke would be 9D12-31.

c. The letters assigned to identify installations will be promptly reported to the Director, Mobilization Division, Army Service Forces, which will notify all agencies concerned with these movements. Where such reports have already been made, they need not be made again.

50. Clothing and Equipment.

a. Groups. Separation groups will be provided organizational equipment, as prescribed in appendix VI, when the length of the journey indicates the necessity therefor, as determined by the commanding general of the service command. Accountability for equipment carried by each group to a separation center will be transferred to the appropriate supply officer of the station to which the group is destined. The group leader will sign for the equipment and will be responsible for its care during the period of travel. The equipment will be turned in to the new accountable property officer immediately upon arrival at destination. An appropriate shipping document will be issued at the station effecting transfer, listing the equipment involved, the name, rank, and serial number of the group leader who is responsible for the property, and the station supply officer to whom accountability is transferred. One copy of the shipping document will be mailed to the appropriate station supply officer and two copies will be given to the group leader for delivery to the supply officer. Upon turn-in of property at destination, one copy of the document receipted by the supply officer will be returned to the group leader to relieve him of responsibility.

b. Individuals.

(1) Enlisted personnel will, upon movement to a separation center, carry with them the items listed in paragraph 11*b* or *c*, AR 615-40, mess gear required for the journey, and the following additional items:

One raincoat.

One pair trousers, cotton or wool, as appropriate (enlisted men only).

One jacket, WAC	{	matching summer or
One skirt, WAC		winter as appropriate
One cap, WAC		(for enlisted women only).

Prior to departure, a check will be made by the installation commander to insure that the prescribed clothing and equipment in serviceable condition are in the possession of the individual.

(2) Individual Clothing and Equipment Record (WD AGO Form 32) will be adjusted to reflect only the items taken by the individual to the separation center. Statements of charge and, where necessary, reports of survey will be instituted for shortage or damage prior to movement to the separation center. Any unsatisfied indebtedness will be entered in the service record.

(3) The provisions of paragraph 16*k*, with regard to weapons and live ammunition, are applicable.

(4) Commanding officers will require personnel to carry all government issue clothing and equipment, for which they are responsible, in their personal possession as "hand baggage" during movement to a separation center. Failure to comply with this requirement will impede processing at the separation center. The checking of baggage "through on railroad tickets" will not be construed to comply with this provision. However, when a baggage car is provided for exclusive use of a group moving to a separation center, the use of such baggage car for movement of baggage of the group will be considered to fulfill these requirements.

51. Records.

Prior to departure for the separation center, personnel records of individuals will be thoroughly checked and brought up to date by unit and station commanders. The personnel records indicated in paragraph 15*b* will be for-

warded to the separation center in custody of the group leader.

52. Movement Orders.

a. Orders will be issued for movement of each group to a separation center. Such orders will contain the following information:

(1) The command which issued the orders.

(2) Code designation for each group.

(3) Data concerning personnel, as indicated in paragraph 13*b*.

(4) The escort personnel and custodian of records will be indicated by name.

(5) Appropriation to which travel is chargeable.

(6) In the case of individuals detailed as escort personnel who are not designated for separation, the orders will indicate disposition upon completion of this duty.

(7) Statement indicating whether travel is on permanent change of station, temporary duty and whether travel is with troops. (See WD Circular No. 260, 1944.)

b. Orders will be distributed as follows:

(1) Two copies to the group leader concerned, to be retained in his possession until called for by proper authority at the separation center. (In addition to any required for personal use of individuals.)

(2) Eight copies to the separation center commander by most rapid means of transmission available so as to arrive prior to the personnel.

(3) For officers only, one copy to The Adjutant General, Attention: Officers' Branch (PO-A), by most rapid means of transmission available.

53. Movement to Separation Centers.

a. Clearance for movement. No separation group will be moved to a separation center until clearance has been obtained from the personnel center commander in the manner prescribed in paragraph 31*a* for reception station groups. When clearance cannot be arranged promptly, the facts will be reported to the Director, Mobilization Division, Army Service Forces, for issuance of appropriate instructions.

b. Report to separation center. Report of movement of separation groups will be made by station commanders, train or convoy com-

manders, and group leaders, as provided in paragraphs 31*b*, *c*, and *d* for reception station groups.

54. Instructions to Train Commanders, Convoy Commanders, and Group Leaders.

Train commanders, convoy commanders, and group leaders will, prior to their departure, be instructed as to their duties and responsibilities in the same manner as provided in paragraph 31*e*.

55. Transportation for Movements.

The provisions of section IV, WD Circular No. 358, 1944, and WD Circular No. 229, 1943, are applicable to these movements.

56. Consolidation of Movements.

a. Responsibility. It is recognized that demobilization of small units and release of non-essentials from installations at which demobilization of units does not occur might result in a multitude of individual movements or movements of comparatively small separation groups to various separation centers throughout the country. Therefore, commanding generals of service commands are charged with the responsibility of consolidating separation group movements originating at installations within the territorial limits of their respective commands, including class III and IV stations.

b. Basic principles. In effecting such consolidation, the following basic principles will be adhered to:

(1) Movements to separation centers will be made in separation groups of not less than 40 individuals except when this would be impracticable or uneconomical as determined by the commanding general of service command. Groups may include both officer and enlisted personnel.

(2) Consolidation for movements to separation centers will be arranged in such a manner as will involve minimum backhaul by rail.

(3) In designating installations for assembly of nonessentials for organization of separation groups, commanding generals of service commands will, whenever possible, make full utilization of installations at which demobilization of units is in process. Other installations may be designated for the consolidation of non-

essentials and formation of separation groups in order to conform to the principle of minimum back travel by rail and to permit execution of movements without delay during periods when there are no units being demobilized within the service command.

c. Service command separation control centers. Each commanding general of a service command will establish at his headquarters from personnel under his control, a service command separation control center for the purpose of coordinating and consolidating separation group movements originating from installations within his command.

d. Movement control within service commands. The separation movement control plan within each service command will function substantially as follows:

(1) When final determination has been made that discharge or release from active duty will be effected, the personnel to be separated will be reported to the post, camp, or station commander.

(2) When a separation group of the established size (40 or more individuals) can be organized by a station commander from the nonessential personnel available at his station the group will be moved, subject to clearance for movement as provided in paragraph 53, direct to the appropriate separation center. Request for routing will be made to the Chief of Transportation (Traffic Control Division) in accordance with Section IV, WD Circular No. 358, 1944.

(3) When a number of nonessentials less than the minimum number (40 individuals) is available for movement from a given station to the same separation center, such fact will be reported to the service command separation control center which will arrange for movement of such personnel to a station within the service command for consolidation with other nonessentials, or authorize shipment direct to the separation center without consolidation. When a separation group has been formed at the consolidating station or at the home station, clearance will be arranged with the personnel center. Request for routing will be made in accordance with (2) above, when applicable.

Section VIII

MISCELLANEOUS

57. Maintenance of Security.

a. Instructions to personnel. All personnel will be cautioned prior to departure from overseas stations against compromising classified military information and advised of their responsibility in avoiding unauthorized publication or dissemination thereof. Such other restrictions as are deemed necessary, such as concern press interviews, radio interviews, and so forth, will be called to the attention of the personnel involved. Personnel will be advised to cooperate with authorized and properly identified intelligence officers representing the United States both overseas and after arrival in the United States.

b. Security of code designations. Since the war with other enemies will be continuing during the period of these movements, necessary precautions will be maintained with regard to movements from overseas commands to the United States and to territories and possessions. Orders for movements of units from overseas are classified as **Confidential** when issued; however, after the unit has arrived at destination, the classification of such orders may be reduced to **Restricted**. Code designations for movements from disposition centers to reception stations and from posts, camps, and stations to reception stations and separation centers are being used for convenience and identification purposes; therefore, maintenance of security is not involved.

58. Direct Communication.

Direct communication between field agencies on matters pertaining to movements covered herein is authorized as follows:

- a.** Between commanders of overseas commands.
- b.** Between overseas commanders and commanders of United States ports.
- c.** Between overseas commanders; the Commanding General, Air Transport Command; and commanders of overseas airports and water ports.
- d.** Between United States ports and personnel centers.
- e.** Between commanders of service commands and class III and class IV stations.
- f.** Between disposition centers and personnel centers.
- g.** Between post, camp, and station commanders and personnel centers.

59. Record of Code Designations.

Commanders issuing code designations for readjustment plan movements will maintain accurate records thereof to prevent duplication and to serve as a dependable reference to any movement after the assignment of a designation. Such records will contain the following basic data:

- a.** Date each code was assigned.
- b.** The codes assigned.
- c.** Unit or group to which each code was assigned.
- d.** Destination of movement.
- e.** Agency assigning the code.

APPENDIX I

READJUSTMENT INSTALLATIONS

SECTION II

PERSONNEL CENTERS ARRANGED ALPHABETICALLY INDICATING AREAS SERVED

A. For personnel returning *by water or air* transportation from the following commands:

U. S. Army Forces, European Theater of Operations.

U. S. Army Forces in the Africa-Middle East Theater of Operations (including WASC and USAF in Liberia).

U. S. Army Forces, Mediterranean Theater of Operations.

*North Atlantic Division, ATC (for Eastern Canada only).

#U. S. Forces, India-Burma Theater.

#U. S. Forces, China Theater.

#Persian Gulf Command.

Eastern Defense Command (Iceland Base Command, Bermuda Base Command, Greenland Base Command, and Newfoundland Base Command).

*For returns by *water* only—See List D for returns by *air or rail*.

#When the theater commander has *definite* knowledge in advance that personnel on a particular vessel will be debarked at a west coast port in United States, List B will be utilized.

Personnel center	States served		Reception station code No.
	Male personnel	Female personnel	
Atterbury, Ind. (Camp)	Indiana Kentucky Tennessee		6
Beale, Calif. (Camp)	California (north of 35th parallel latitude)	California Nevada Oregon Washington	14

APPENDIX II

SAMPLE MOVEMENT ORDER NO. 1 (UNITS)

SECTION I

DIRECTIVE

U. S. FORCES IN THE EUROPEAN THEATER OF OPERATIONS, PARIS, FRANCE

(Date)

SUBJECT: Movement Orders, RE101

To: (Addressees Applicable)

1. Under authority of WD letter (or radio), -----, the units
(date)
listed below are assigned for movement to Shipment RE101:

A—14th FA Obs Bn

B—*567th Port Co

C—33d Repl Bn

2. Shipment RE101 will move on or about ----- from present oversea
(date)

station to a United States port at which the units will be demobilized in accordance with orders to be issued by the War Department.

3. (Instructions regarding clothing and equipment to accompany the units.)

4. A personnel roster will be prepared by each unit on dual mimeograph stencils in the manner prescribed in paragraph 14a, Readjustment Regulations 1-2. Such roster will provide the personnel data required by paragraph 13b of those regulations and in the form indicated by Appendix II thereof. One copy of the roster (produced from No. 1 stencils) and a copy of this directive, together with a certified Form 66-2, 66-3, or 66-4 for each officer listed, will be furnished by the unit commander to (agency designated by theater) in such time as will enable dispatch by air mail or air courier at least 3 days prior to embarkation to The Adjutant General, Attn: Officers Branch (PO-A). A copy of the corrected personnel roster (produced from the No. 1 stencils corrected as of embarkation) together with additional Forms 66-2, 66-3, and 66-4, as necessary, will be furnished to (agency designated by theater) for dispatch within 24 hours after embarkation by air mail or air courier to The Adjutant General, Officers Branch (PO-A). The No. 1 stencils of the personnel roster, corrected as of embarkation, will be delivered to (agency designated by theater) for dispatch together with the No. 1 stencils of this directive, a copy of the orders (directive and roster) by air mail or air courier to the appropriate US port. The No. 2 stencils of the personnel rosters and two copies of the roster produced from the No. 1 stencils corrected as of embarkation will be retained by unit commanders and will be corrected aboard ship to agree with the Transport Commander's certified passenger list. The No. 2 stencils will be delivered by the unit commanders to the proper authority at the US port (disposition center). At the appropriate time the No. 2 stencils of this directive will be furnished the commanding officer (unit designated) for delivery to the proper authority at the US port.

5. (Instructions concerning personnel and administrative records.)
6. Shipment RE101 will be under the control of the CG, Army Service Forces, from time of departure from oversea station until released to proper authority in the United States.
7. Postal procedures outlined in paragraph 111, Changes No. 5, FM 12-105 will be complied with.
8. (Other instructions considered necessary by the oversea commander.)
9. TDN. PCS. TT. (Allotment No.).

BY COMMAND OF -----

NOTE.—Classification of this order is *Confidential*. The sample above is a suggested form; its use is not mandatory, provided the information required is given in the order or an inclosure attached thereto.

NOTE 1.—Prepare similar lists for each reception station accounting for all members of the unit. The list for each reception station will be prepared on a separate stencil or group of stencils.

NOTE 2.—The format illustrated may be modified to permit use of addressing equipment to impress data on stencils provided all information indicated is given. The following is required: (1) Names will be listed in the first column; (2) addresses will be listed in the last column; and (3) a minimum 1½ inches space will be left on the right of the list to permit, when practicable, re-use of the stencils for other purposes at installations in the United States.

APPENDIX III

SAMPLE MOVEMENT ORDER NO. 2

(Reception Station Group Organized Overseas)

SECTION I

DIRECTIVE

U. S. ARMY FORCES IN THE MEDITERRANEAN THEATER OF OPERATIONS,
CASERTA, ITALY

(Date)

SUBJECT: Movement Orders, RN52-2.

To: (Addressees Applicable)

1. Under authority of WD radio -----, the individuals listed
(date)
in attached personnel roster are assigned for movement to Reception Station Group RN52-2.
Group RN52-2 Group Commander and Custodian of Records: Capt. Perry Warren.

2. Shipment RN52 will move on or about -----, from present
(date)
oversea station to a reception station in the United States to be named by indorsement to this
order by the commanding general of the port at which shipment is debarked.

3. (Instructions on clothing and equipment and records to accompany the groups; instructions
regarding forwarding WD AGO Forms 66-2, 66-3, and 66-4 and orders to The Adjutant General;
and instructions regarding disposition of stencils for directive and roster).

4. (Special instructions regarding disposition of assigned escort personnel who are not surplus
personnel.)

5. Shipment RN52 will be under the control of the Commanding General, Army Service
Forces, from time of departure from oversea station until released by proper authority in the
United States.

6. Postal procedures as outlined in paragraph 111, Changes No. 5, FM 12-105, will be com-
plied with.

7. (Other instructions considered necessary by the oversea commander.)

8. TDN. PCS. TT to US port. (Allotment No.).

BY COMMAND OF -----

SAMPLE INDORSEMENT BY PORT OF EMBARKATION

Hq. Hampton Roads Port of Embarkation, Newport News, Va., (date)

To: The Commanding Officer, Reception Station, Fort Dix, N. J.

1. Shipment RN-52 arrived at this port on -----
(date)

2. Shipment RN-52-2 will proceed by rail to _____, during
the period _____ to _____
(date) (date)

3. TDN. PCS. *TT. (Allotment No.)
FOR THE COMMANDING GENERAL:

Similar orders and indorsements will be made for other groups included in Shipment RN-52.

NOTE.—Classification of this order is Restricted. The sample above is a suggested form; its use is not mandatory, provided the information required is given.

*Omit "TT" if not applicable.

ANDERSEN, Christian	Pvt Inf	32024076	B	745	174	Penn Ave., Medford L. I., N. Y.

(List remaining members of unit to be assigned to this group)

NOTE 1.—Except for the code designation NYK-200-2 this roster is identical with the sample given in section II, appendix II, since it is produced from the stencils initially prepared for movement order issued overseas. The group code designation "NYK-200-2" is entered at the US port by typing on the roster stencils.

NOTE 2.—If more than one unit is being demobilized at the same time at a disposition center, where practicable, the personnel of such units destined for the same reception station may be included in one group. In such case movement order is prepared by annexing to the movement directive copies of that part of the roster of each unit listing the personnel destined for the reception station concerned.

APPENDIX V

LIST OF EQUIPMENT TO ACCOMPANY CATEGORY IV UNITS RETURNING FROM OVERSEA COMMANDS

(Allowances of the items contained herein are as prescribed in the T/E or T/O and E applicable to the unit, except where otherwise indicated)

9708500	Kit, Component, Pouch.....	Each.....	1
1300805	Neosynephrin Hydrochloride Jelly, 12 tubes.....3 tubes		
1339600	Phenobarbital, 100 tablets.....	Bottle.....	1
2013000	Cotton, Absorbent Compressed, 1-ounce.....	Each.....	2
2024000	Gauze, Plain, Sterilized, 36-inch, 1 yard.....	Each.....	2
3611000	Applicator, Wood, 6 gross.....50 applicators		
3668000	Depressor, Tongue, Wood, 100.....20 tongue depressors		
3773000	Stethoscope.....	Each.....	1
7945700	Vial (prescription bottle), ½-ounce for the following.....1 vial		
1149000	Codeine sulfate, 500 tablets, U. S. P. ½ gr.....50 tablets		
794600	Vial (prescription bottle), 1-ounce, for the following.....1 vial		
1150500	Compound Cathartic, 1,000 pills or tablets.....100 tablets		
7947000	Vial (prescription bottle), 2-ounce for the following.....1 vial		
1418000	Sodium Bicarbonate and Peppermint, 1,000 tablets.....180 tablets		
7984000	Vial (prescription bottle), 4-ounce; 1 each for the following.....3 vials		
1009400	Acid, Acetylsalicylic Compound with Codeine, 1,000 tablets.....160 tablets		
1010000	Acid, Acetylsalicylic, 1,000 tablets.....250 tablets		
1486000	Tincture Opium, Camphorated, 1 pint.....4 ounces		
9101000	Acid, Boric, Ointment, 1 ounce.....	Tube.....	4
9103000	Bismuth Subcarbonate, 500 tablets.....	Bottle.....	1
9109500	Eye Dressing Set.....	Each.....	2
9200000	Bandage, Gauze Adhesive, White, 1- by 3-inch, 16.....	Each.....	4
9200200	Bandage, Gauze, Compress, White, 4- by 4-inch.....	Each.....	4
9204000	Bandage, Triangular, Compressed, White.....	Each.....	6

(Additional medical supplies and equipment should be designated for issue to the medical personnel accompanying movement of casual groups as required by the nature of the journey, geographical location, and any other factors which dictate the need for supplementary items.)

SECTION II

LIST OF MEDICAL SUPPLIES AND EQUIPMENT TO BE ISSUED TO EACH MEDICAL NONCOMMISSIONED OFFICER ASSIGNED TO ACCOMPANY MOVEMENT OF GROUPS

Number	Item	Unit	Quantity
9711000	Kit, medical Noncommissioned Officers, complete.....	Each.....	1
7947000	Vial (prescription bottle), 2-ounce for the following.....1 vial		
1418000	Sodium, Bicarbonate and Peppermint, 1,000 tablets.....180 tablets		
7948000	Vial (prescription bottle), 4-ounce, for the following.....1 vial		
1010000	Acid, Acetylsalicylic, 1,000 tablets.....250 tablets		
9101000	Acid, Boric, Ointment, 1-ounce.....	Each.....	2

(Additional medical supplies and equipment should be designated for issue to the medical personnel accompanying movement of casual groups as required by the nature of the journey, geographical location, and any other factors which dictate the need for supplementary items.)

APPENDIX VIII

PRE-EMBARKATION HEALTH CERTIFICATE

(Designation of Unit or Group)

For the information of the transport commander and of quarantine officers at foreign ports, and for transmittal to responsible commanders en route and at destination, the following statements are herewith certified:

1. Those infectious and parasitic diseases to which the personnel concerned have been exposed, or which are known to be present among them (or the infectious or parasitic diseases prevalent in the areas from which the personnel are drawn) are as follows: -----

2. The exposure to or incidence of vermin among the personnel (or the incidence of vermin infestation in the areas from which the personnel are drawn) is as follows: -----

Disinfestation (was) (was not) performed.

(Date of disinfection, if performed.)

3. The personnel concerned have been physically inspected _____ and are
(Place) (Date)
free of venereal disease except as noted below and are free of acute communicable disease which,
if introduced aboard the vessel, might reasonably be expected to result in a serious epidemic. They
include no case of quarantinable disease (cholera, leprosy, smallpox, plague, epidemic typhus, and
yellow fever) except as follows: _____

4. All personnel concerned satisfy immunization requirements of AR 40-210 and other War Department and pertinent theater directives concerning special immunizations. Special cognizance is taken in this regard of the requirements of land areas to or through which personnel will be transported. Persons not properly immunized are the following:

Name	Character of excep- tion	Reasons therefor	Evidence of necessity to travel and waiver of requirements
(Continue on reverse side if necessary)			

Date _____

For the Commanding Officer,

Place _____

[illegible]

(The sample above is a suggested form; its use is not mandatory, provided the information required is given.)

APPENDIX IX

PRE-DEBARKATION HEALTH CERTIFICATE*

(Designation of Unit or Group)-----
Designation of Vessel (U. S. Port Serial Number)

This is to certify that:

1. The above designated personnel have been physically inspected at -----
-----, and have been found free from acute communicable diseases, venereal
(date) diseases, quarantinable diseases (cholera, leprosy, smallpox, plague, epidemic typhus, and yellow fever) and vermin.

2. No quarantinable disease has been aboard this vessel during the present voyage.

3. This vessel has, during the present voyage, entered no port in which there was present any quarantinable disease, or which was not considered clean by the United States Public Health Service; or if such entry has been made, the action of the vessel and personnel aboard while in port was such as to preclude the danger of acquiring quarantinable disease.

4. The sanitary condition of the vessel is satisfactory, its rodent colony is not excessive, and it possesses a valid deratization or deratization exemption certificate.

5. Exceptions to the above are as follows: -----

(Continue on back if necessary)

6. Recommendations -----

-----	-----	-----	-----	-----, 194
Commissioned Medical Officer	Grade	Title	Date	
-----	-----	-----	-----	-----, 194
Master of vessel				

*To be completed by a commissioned medical officer. This certificate together with the Pre-embarkation Health Certificate comprise the evidence upon which quarantine procedure will be determined. Copies of both will be held available for inspection by the Quarantine Office of the United States Public Health Service, or in the event of exemption from inspection, will be forwarded to that officer within 24 hours. Copies will also be given United States port commander.

(The sample above is a suggested form; its use is not mandatory, provided the information required is given.)
